## Content

# SURFACE TREATMENT. COMPLETE. FROM A SINGLE SOURCE.

Dear Customers,

You can turn it and flip it the way you want ... On around 300 pages of our new combined catalogue, you will find the whole range of products for mechanical surface treatment. Regardless of whether you would like to cut, grind and sand or clean, brush and polish - we are there for you.

We, the companies of DRONCO and Osborn. With over 180 years of mutual experience in surface finishing, we have a solution for almost all of your application requirements. We are also pleased to assist you finding the right product.

In the DRONCO section, you will find our product portfolio of cutting discs, grinding discs, flap discs, polishing flap discs, diamond cutting discs and diamond tools, bonded abrasives, ceramic abrasives and technical brushes.

If you are a customer of DRONCO today, we invite you to get to know the other side: Simply flip the catalogue and discover the Osborn product world of machine brushes, hand brushes, polishing and satin finishing tools, brush technology for industrial applications and special solutions.

The good thing is, you do not need another customer number or another contact person. Just talk to your well-known contact and you can order both DRONCO and Osborn products with your existing customer number. Try it out! We look forward to working with you!

# WITH DRONCO INTO POLE POSITION

DRONCO is one of the biggest and most innovative manufacturers of abrasives in Europe.

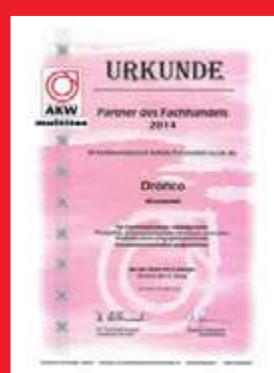

## WELCOME AT DRONCO

DRONCO is one of the biggest and most innovative manufacturers of abrasives in Europe. Our company is part of the Jason Industries, Inc. to which Osborn belongs as well.

With its production plants in 14 countries and around 2,000 employees worldwide, the Jason Industries, Inc. serves markets in 120 countries with quality tools for surface treatment.

DRONCO currently owns the most advanced manufacturing technology for cutting and grinding discs in Europe. We are producing approximately 200,000 cutting and grinding discs and 40,000 flap discs every day in our production plant in Wunsiedel (Bavaria).

Our range of cutting and grinding discs, diamond tools, ceramic abrasives, abrasive paper sheets and technical brushes for professional craftsmen as well as demanding do-it-yourselfers is produced in globally recognized high quality.

## INNOVATION DRIVER

DRONCO is among the most innovative and agile manufacturers in the abrasive sector.

Our own R+D department is working in modern laboratories on future-oriented technologies for abrasive tools. Existing products are continuously improved as well.

## CUSTOMER-ORIENTED

For us, client orientation is of absolute importance. DRONCO was awarded 1st place as "Commercial Partner of the Specialized Trade" multiple times throughout the last years.

Evaluation criteria were: trade loyalty, innovative strength, marketing and sales support as well as the handling of complaints.

# INNOVATIVE. CUSTOMER-ORIENTED. RELIABLE.

# FORWARD-THINKING PRODUCTION TECHNOLOGY

DRONCO sets standards for the future already today.

"Progress - Made in Germany" is for us the perfect interaction of indicative technology and sustainable research and development.

## HIGH-TECH & SUSTAINABILITY

Intelligent manufacturing technology of the latest generation, highly qualified employees and the unique DRONCO Production-System allows a flexible, rational and exact production, according to the highest quality standards here in Germany.

DRONCO has developed a pressing technology that ranks worldwide among the most advanced systems. With an almost complete renewal of our machinery, we are one step closer to attain our ambitious target, to take over the technology leadership in our branch.

With an investment of six million Euros, we further extended and modernized our production site in Wunsiedel until mid of 2016.

Now DRONCO has the most advanced presses for cutting and grinding discs in Europe. This technology helps us to ensure the high quality of our products and to reduce emissions at the same time, making a sustainable contribution to preserving the environment. We will continue to do everything to strengthen our competitive position for the future.

## RESEARCH & DEVELOPMENT

Our R+D team is working in modern laboratories on future oriented technologies for abrasive tools, resulting in product innovations and a continuous improvement of existing products with regard to cutting ability, lifetime, speed and precision.

The results are diverse pending patents and the market launch of several world innovations in the field of groundbreaking cutting and grinding technologies.

## QUALITY & PERFORMANCE TESTING

In order to determine the performance of our products, we are testing with a state-of-the-art industrial robot. The robot delivers precise results and allows our quality assurance to carry out various tests under the exact same conditions.

In addition to a pure performance determination, the robot also helps us to ensure a consistently high standard by means of permanent checking. Complex processes can be simulated easily; realistic simulations are used especially for product development and the permanent optimization of existing tools.

# SUSTAINABLE RESEARCH + DEVELOPMENT

Here at DRONCO, the R+D department is of great importance. Newly built laboratories with state-of-the-art technical equipment meet all requirements for testing, chemical and analytical procedures and applications.

# OUR PRODUCTS SAFETY FIRST

Work safety is an important task. This is why DRONCO treats this issue in a particularly responsible manner. Users and dealers are on the safe side with us.

## HIGHEST SAFETY STANDARDS

Cutting and grinding require a very high circumferential speed of the rotating tool in many areas of application. Therefore, our products are specifically designed to safely withstand the extreme mechanical and thermal stresses and strains. All DRONCO products correspond to current standards.

Continuous tests guarantee the observance of the highest safety standards. For this purpose, a further, state-of-the-art test system for side load tests was put into operation.

Complex measures for product testing are carried out on the new system. First, cutting discs are subjected to a pre-defined lateral load and then subjected to a fall hammer test. The test results are automatically recorded and evaluated.

Our quality management system ensures that we meet the high demands of a modern, worldwide acting industrial enterprise on each level. Certification in accordance to DIN EN ISO 9001:2008 is therefore just as natural as our membership with oSa.

## CERTIFIED SAFETY

We manufacture according to the strictest directives worldwide and monitor the safety and quality of our products according to the latest standards and regulations:

EN 12413

European safety standard for cutting and grinding discs

EN 13743

European safety standard for bonded abrasives

EN 13236

European safety standard for diamond tools

E DIN ISO 13942, 603-16, 6103, 15635

Dimensions, tolerances and unbalance

**DRONCO IS MEMBER OF OSA**

# MANUFACTURING & QUALITY ASSURANCE ACCORDING TO STRICT REGULATIONS

# MODERN LOGISTICS

DRONCO products are used in more than 100 countries in the world.  
Modern logistics ensures complete and timely deliveries to our customers.

## LOGISTICS CENTER WUNSIEDEL

Our high standards to manufacturing continue also at the field of logistics. Our new logistics center, close-by to the production, has been opened in 2008 and offers

- 4,000 sqm storage space
- 950 sqm office space
- 2,500 sqm traffic area
- 1,400 sqm space for packing
- as well as a high rack storage area with space for
- 9,200 pallets and
- 4,800 ground level shelves.

Automated warehousing ensures complete and timely delivery of the products - to the satisfaction of our customers. Intelligent software enables transparent logistics.

## DRONCO CODE OF CONDUCT

The legal framework has become very complex, even for traditional companies and the globalized economic relations have implied new requirements.

The integration of a code of conduct in the company organization ensures a systematical control and documentation of the compliance. DRONCO is committed to prevent bribery and to comply with ethical principles towards customers, competitors and business partners.

Our code of conduct comprises regulations against corruption, forced and child's work and defines social and ethical standards to be applied. It is valid not only for all employees but also for our suppliers worldwide. Dronco takes part of the annual company statements of the BME. Our compliance-management is training the employees, controls the compliance and is the contact-person for all demands and questions.

More information about the BME can be found on the web:  
[www.bme.de](http://www.bme.de)

# COMPLIANCE MANAGEMENT

DRONCO has joined the Code of Conduct of the BME and has implemented a code of conduct into the company organization.

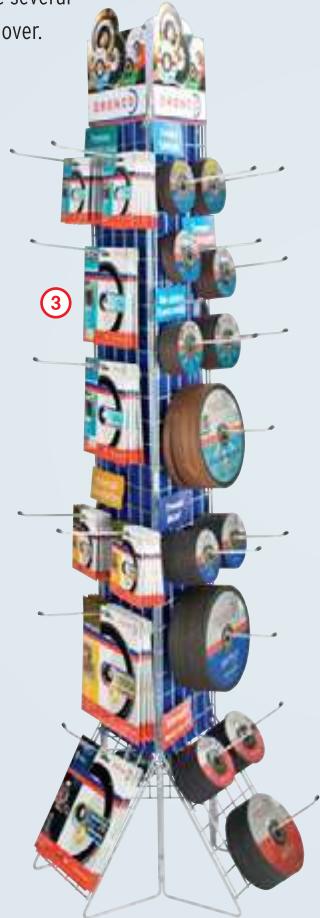

# SOLUTIONS FOR A STRONG PRESENTATION

DRONCO – a strong brand. Our extensive support promotes your turnover!

## EXCELLENT SALES PROMOTION

Our sales promotion is coordinated constantly to the needs of the trade. Attention-strong sales assistance at the POS and the newly arranged product shelf is lastingly supporting your sales. Dealer promotion activities taking place several times during the year are providing additional turnover.

### ① DRONCO Wire Presentation for tins:

Our bestseller: The 1mm special disc for steel and stainless steel in a 10-pack tin. Simply hang in the support between the modules or in a rear panel (suitable adaptor supplied) and watch your sales take off!

Dimensions: 15 x 135 x 16 cm

### ② DRONCO Sales Display:

Diamond blades F5 cera speed  
Dimensions (BxHxT): 16x36x23 cm

### ③ DRONCO Triangle Display:

Can be stocked individually with new or standard products.  
Dimensions: 28 x 175 cm

### ④ DRONCO Sales Display for Polishing Flap Discs:

Many customers say "grinding" but really mean "derusting and polishing". Show them that you are the expert!  
Dimensions: 42 x 34 x 28 cm

### ⑤ The DRONCO Classic:

Stainless Steel Tin Promotion Display  
The sales hit at every counter.  
Dimensions (BxHxT): 20x31x20 cm

## INNOVATIVE PRODUCTS

As a DRONCO dealer you will profit from our extensive manufacturer's authority. With perfect product quality, highest safety standards and constant innovation we are setting standards on the market.

## BEING IN THE MEDIA

DRONCO regularly places colour advertisements in technical and specialized magazines, and provides PR articles in order to sensitize the end user on the premium brand - excellent measures for an excellent product range!

## TRAINING OF YOUR SALES STAFF

Confidence in the sales talk with the end user generates a rise in turnover. Your sales personnel will receive professional knowledge in an entertaining and interesting training course which contains theory and practice.

## ATTRACTIVE DESIGN

We present ourselves on the market visually clear and well planned. This includes packaging as well as contents. An effectively arranged colour guideline system leads easily and surely through the product assortment.

## PROMOTION VAN

We support the specialized trade with promotion vans, which are constantly in use on in-house fairs, on open days, or locally together with the specialized trade and the end user.

# PRODUCT PROMOTION

# ATTENTION GUARANTEED

Professionals set the standard – also with the presentation at the point of sale.

## EXCELLENT SALES PROMOTION – ADDITIONAL TURNOVER

Our elaborate concept provides for a premium sales promotion and increases your image as a top-quality supplier. Intelligent goods presentation and eye-catching sales assistance is lastingly supporting your sales. The DRONCO product shelf offers you an abundance of options to present your premium assortment of goods in a clear and attractive way.

## EXCLUSIVE SERVICE FOR OUR DEALERS

The labeling of the product shelves as well as the supply lists are exactly adjusted to your demands. Colour coding systems facilitate orientation.

## MODULAR ACCESSORIES

Colour coding systems facilitate orientation

Lockable hooks

Modular display assembly in different dimensions:

Individual modules that fit into common systems  
with widths of 1.0 and 1.25 m

Diamond show case with  
Plexiglass door

The complete DRONCO product range is presented progressively and dynamically. 3x1.25 m

# 3 PRODUCT LINES FOR EVERY APPLICATION

Three quality lines according to the good-better-best principle: From the solid craftsman's quality to the high-performance tool for the most intensive use.

| GOOD                         | BETTER   | BEST  |   |

| <b>ABRASIVES</b>             |  perfect      |  special      |  evolution |

# ADDITIONAL BENEFIT

D R O N C O®

Beside the specific cutting and grinding performance many of our products have an additional benefit for the user.

## EXPRESS - THIN, PRECISE, FAST

- considerably faster
- exact cutting
- no chipping on the edges
- effortless performance

## PROTECT - PRESERVE YOUR HEALTH

- less noise
- less vibration
- less dust

## FREECUT - PROBABLY THE WORLD'S SAFEST CUTTING DISC

- no pinching in the cut
- reduced danger of 'kick-back' effect (setback of the angle grinder)
- no lateral friction

## CUT+GRIND - THE CLEVER COMBINATION OF TWO FUNCTIONS

- cutting and grinding with one disc
- no change of disc necessary
- fast cutting with high removal rate

## BATTERY FRIENDLY - FOR CORDLESS POWERED ANGLE GRINDERS

- flexible in usage
- easy to handle
- precise working

## Some general information

The following information gives you the best possible overview about the features of our products.

### ① Description

Compiled for cutting discs as follows:

A/AS – aluminium oxide is the abrasive grain for cutting metal.

AZ – zirconium corundum is the abrasive grain for better life time and cutting efficiency.

46 – indicates the grit size. The higher the number, the finer the grit. E.g.: 24 rough | 30 medium | 36 fine ...

R – the second letter indicates the hardness of the disc. The further into the alphabet, the harder the disc.

BF – resin bonded, fibre-reinforced

### ② Product lines

perfect | evolution | special

Explanation see next page.

### ③ Blue background

Is the colour coding for metal cutting discs.

### ④ Safety standards

Our products comply with the highest safety standards and regulations:

EN 12413 - cutting and grinding wheels

○S – organisation for the safety of abrasives.

### ⑤ Measurements

Consist of (diameter of the disc)

x (thickness of the disc)

x (bore size).

Measurements given in mm and inch.

### ⑥ Expiry date

This quality cutting disc can be used without any restrictions until the indicated date.

(V month/year)

### ⑦ Max. rpm.

Indicates the permitted maximum speed.

### ⑧ FE/S/CI ≤ 0,1%

Free from iron, sulphur and chlorine.

Special disc for cutting stainless steel.

### ⑨ Safety information

Security information: For your own safety.

Please follow!

### ⑩ Red bar

Indicates 80 m/s as permitted peripheral speed.

#### Green bar

Indicates 100 m/s as permitted peripheral speed.

### ⑪ Made in Germany

Stands for proven quality – most of our products are manufactured and tested in Germany.

### ⑫ www.dronco.com

24 hr service on our website – we are always there when you need us!

CUTTING DISCS

## Product lines

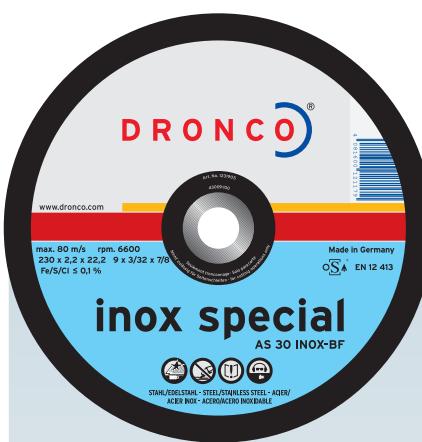

For craftsmen or industrial use - three precisely co-ordinated product lines offer the right cutting disc for every user and every application. All discs comply with the relevant regulations, have a high specific cutting capacity and guarantee a maximum of safety.

### perfect line

The best-seller with an excellent price/performance ratio. It has proven itself a million times in the hands of craftsmen and semi-professionals.

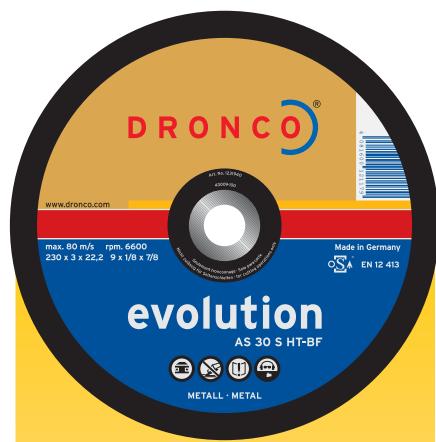

- manufactured according to EN 12413
- complies to oSa regulations

### special line

The special line for craftsmen and industrial applications. Due to the fact that different materials impose different demands, DRONCO produces discs especially matching the respective material. Special types of corundum and bonds are combined to suit the task in hand. This optimises performance, extends service life, increases efficiency and reduces cutting time.

- manufactured according to EN 12413
- complies to oSa regulations

### evolution line

Designed by experts and made of top quality raw materials, these all-round cutting discs combine outstanding service life with high cutting speed.

- manufactured according to EN 12413
- complies to oSa regulations

### Professional application

Top product: extremely fast cutting,  
outstanding service life, minimum effort

### Demanding application

Very good cutting performance, high service life

### Standard application

Good cutting performance, good service life

You can get Dronco metal cutting discs in different performance classes - from a standard product for occasional use up to the high-end product for professional applications.

\* compared to a standard 1mm cutting disc, stored for 6 weeks and subject to a natural ageing process which results in reduction of service life.

# METAL CUTTING DISCS

## Free hand cutting discs stainless steel/steel 1,0 mm

| A 60 R 1 mm   | perfect   | Free hand    | ★★★☆☆   |
|---|---|--------------|---|
|  | The economic alternative for thin steel cutting discs. Good cutting ability with a good lifetime, manufactured in 1 mm. |              | Thin-walled profiles and sheet metals in structural and container work. Is often used in car-body building. Suitable for stainless steel as well. |

\* compared to a standard 1mm cutting disc, stored for 6 weeks and subject to a natural ageing process which results in reduction of service life.

## Lifetime-Plus

- ▷ over 30%\* more service life (number of cuts)
- ▷ stops the natural ageing process of synthetic resin-bonded discs
- ▷ keeps cutting discs fresh until the pack is opened for the first time

>30%

LIFETIME-PLUS

**Why Lifetime-Plus?**

A standard 1mm cutting disc undergoes a natural ageing process during storage due to the absorption of moisture from the air. After just 6 weeks, the tool life can have fallen by an average of approx. 30%. The ingenious Lifetime-Plus freshness seal stops this process before it even starts. Prepare to be amazed at the outstanding life of cutting discs from a freshly opened Lifetime-Plus pack.

# METAL CUTTING DISCS

★★★★

Clearly faster - clearly more precise - clearly better:  
Top class 1mm cutting disc in best quality.  
For precision cutting accurate to the millimetre and  
extremely fast cutting with minimum power consumption.  
No burring, no blue thermal discolouration. Outstanding  
optimized service life. True performance for your money.

- ▷ outstanding service life
- ▷ outstanding cutting speed
- ▷ lowest power consumption
- ▷ precision cutting accurate to the millimetre
- ▷ low-burr or burr-free edges

#### Top of the class in speed and tool life

With our extra-thin, high-speed discs you will cross the finishing line in record time. Yet at the same time you can work in extreme comfort, with absolute safety and the highest level of precision – because you are using the best discs from the DRONCO racing stable.

Thin sheet metal, steel ropes, thin-walled profiles and tubes made of

stainless steel and non-ferrous metals, composite materials.

**AS 60 W HT Jubilee**
**evolution**
**Free hand**

The bond of this high performance cutting disc was developed in the laboratory of DRONCO with the aim of an especially cool cut and was completed just in time for our 50th anniversary. In combination with a ceramic coated grain of the latest generation, a new high end tool was born: The 1 mm cutting disc Evolution AS 60 W HT Jubilee.

State of the art. The benefits of this top product:

- outstanding lifetime
- excellent cutting speed
- cool cuts
- low burr edges

Internal tests showed a lifetime extension of 17% in comparison to even our Evolution AS 60 V. Especially produced to ensure the greatest number of fast and precise cuts with minimum power consumption.

**Lifetime-Plus**

- over 30% \* more service-life (number of cuts)
- stops the natural ageing process of synthetic resin-bonded discs
- keeps cutting discs fresh until the pack is opened for the first time

# CERAMAXX

## OUR STRONGEST DISCS!

WITH CERAMIC GRAIN OF THE LATEST GENERATION  
GIVING AN ULTIMATELY INCREASED PERFORMANCE

**UNRIVALLED SPEED + UNBEATEN AGGRESSION**  
**+ ULTRA LONG LIFETIME + MINIMAL ENERGY INPUT**  
**= HIGHEST EFFICIENCY**

The new bonding technology and the micro-crystalline structure of the ceramic grain ensure a targeted release of new extremely sharp cutting edges. This guarantees the permanent availability of maximum performance of the CeraMaxx cutting and grinding discs - from start to finish. For a maximized cutting speed, removal rate and lifetime.

### The sharpest - the best!

DRONCO CeraMaxx discs are among the fastest, most aggressive and most durable on the market, optimizing the work process, saving down time and labour costs giving greatly increased productivity and efficiency.

CeraMaxx cutting discs with ceramic grain of the latest generation

- Excellent cutting speed = high productivity
- Lowest energy input = sparing man and machine
- Clean, burr-free cut = less rework
- Cool cutting without thermal blueing = less rework
- Excellent lifetime = reduced disc consumption

**ceramic**  
**INSIDE 2.0**

**AK 60 V CERAMAXX**
**evolution**
**★★★★**

The thin CeraMaxx cutting discs cut ultra fast with little effort massively reducing the energy input. The full cutting performance is therefore achieved at low pressure. For precision cutting accurate to the millimetre and with burr-free edges. Ideal for users from pipeline engineering and construction, shipyards, metal engineering, foundries, commercial vehicle construction, steel construction, plant engineering, crane construction, construction machine production.

**The advantages of the CeraMaxx cutting discs prove especially effective in strong profiles and full material. For steel and stainless steel. Fe/S/Cl ≤ 0,1 %**

**evolution**
**★★★★**

The CeraMaxx cutting discs cut ultra fast with little effort massively reducing the energy input. The full cutting performance is therefore achieved at low pressure. Ideal for users from pipeline engineering and construction, shipyards, metal engineering, foundries, commercial vehicle construction, steel construction, plant engineering, crane construction, construction machine production.

**The advantages of the CeraMaxx cutting discs prove especially effective in strong profiles and full material. For steel and stainless steel. Fe/S/Cl ≤ 0,1 %**

# METAL CUTTING DISCS

## ACS 46 / ACS 60 T MULTI

### special

### Free hand

★★★★

The special recipe of this new combi-disc ACS60T-MULTI allows cutting of metal and wall tiles without changing the disc. A special tool for special users, such as plumbers.

Three discs in one

- Combi-disc for stainless steel, steel and wall tiles
- good cutting performance
- comfortable cutting
- no time-consuming disc changes required
- low-burr to burr-free edges

For use on stainless steel, mild steel and stone (especially wall tiles).

### POWER-PACK-TIN

10 cutting discs in the attractive and popular metal box.  
A big seller for guaranteed increased turnover.

Each box includes 10 combi-discs  
ACS 60 T Multi 1,2 mm.

|    |                     | <p><b>FreeCut:</b> The Conical Disc. This disc developed by DRONCO (patent pending) is a revolution in its field. The conical form of the disc tapers from the outer edge to the inner edge and gives the disc ideal cutting qualities. No braking effect caused by side friction, no jamming of the disc in the work piece (thus avoiding the dangerous kick-back effect). The cutting only takes place on the face side. The disc is easy to work with: pleasant, quick and safe cutting, good cutting control, no jamming.</p> <p><b>Greater safety and precision during use.</b></p> <ul style="list-style-type: none"> <li>• does not jam during cutting</li> <li>• reduces the dangerous „kick-back“ effect</li> <li>• less heat generated</li> <li>• reduced side friction for unhindered cutting</li> <li>• light, power-saving handling using the FreeCut principle</li> <li>• less reduction of r.p.m. in the machine – and therefore faster cutting</li> </ul> | <p>For cutting steel and stainless steel, also suitable for non-ferrous metals. Does not contain iron, sulphur or chlorine (each 0.1%). Suitable for thin- and thick-walled profiles and solid material.</p>  <p>The cutting disc tapers towards the center</p> |              |                |                  |             |       |           |                  |                   |                     |       |    |   |            |        |                   |                   |       |    |   |            |        |                      |  |  |  |  |  |  |                   |                   |       |    |   |            |        |                   |                  |      |    |   |            |        |                   |                  |      |    |   |            |        |

### PLEASE NOTE

This product is also suitable for battery-powered angle grinders in diameters 115 and 125 mm.

# METAL CUTTING DISCS

AS 46 / AS 30 T INOX CUT+GRIND special

Free hand

★★★☆

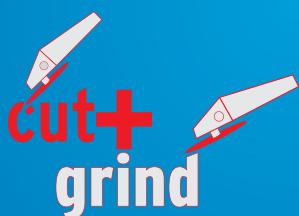

**Cut+Grind:** The first cutting disc you are also allowed to use for grinding. The Cut+Grind cuts at a comfortable speed with a thickness of 2.5 mm or 3.5 mm, you can immediately deburr and grind without changing the disc. That saves setup time and therefore money! Good removal rate for light grinding tasks. Of course, the disc complies with the prescribed lateral load for grinding discs of 290 N.

Suitable for normal and stainless steel, both for solid material as well as for profiles. Cutting and grinding in one step.

Deburr or grind immediately without changing the disc.

The first thin cutting disc you are also allowed to use for side grinding

- cutting and light grinding work in one step
- good cutting speed
- good removal rate
- no time-consuming disc changes required
- no need to purchase different discs
- for steel or stainless steel

# METAL CUTTING DISCS

**AS 30 T**

**special**

**Free hand**

**★★★☆**

The clean cut of this special thin cutting disc enables you to cut sheet metal without contorting the material or producing any burrs.

**Sheet steel, particularly of the type used on tank farms and in tank construction.**

**AS 30 S HT**

**evolution**

**Free hand**

**★★★☆**

With high-temperature treated corundum and balanced bonding, the evolution AS 30 S HT combines the metal removing capacity and cutting performance of a soft disc with the long service life of a hard disc.

**Steel, cast, non-ferrous metals.**

## PLEASE NOTE

Cutting discs for use with stationary machines - from a swing cutting machine right up to a fully automatic machine with a control console and a closed working area. When choosing cutting discs for a stationary machines, please observe the maximum peripheral speed of 80 m/s or 100 m/s as recommended by the manufacturer. DRONCO also supplies discs for so-called "chop saws". These are swing-cutting machines with a driving power up to 2.4 kW/3 HP. Stationary cutting discs must never be used on free-hand machines!

## Some general information

The following general information gives you the best possible overview about the features of our products.

### ① Description

Compiled for cutting discs as follows:

C/CS – silicone carbide is the

abrasive grain for cutting stone.

24 – indicates the grit size. The higher the number, the finer the grit. E.g.:

24 rough | 30 medium hard | 36 hard.

R – the second letter indicates the hardness of the disc. The further into the alphabet, the harder the disc.

BF – resin bonded, fibre-reinforced

### ② Product lines

## DRONCO Express®: Definitely Faster!

### The asset in speed

- much higher cutting speed
- definitely faster cutting

### The asset in precision

- excellent clean cut
- edges low in burrs and free of chipping
- minimum loss of material

### The asset in comfort

- lowest possible force input
- at equal contact pressure
- a minimum of noise
- low in vibration
- little development of dust

**C 24 R**
**perfect**
**Free hand**

Good service life and fast cutting at a reasonable price.  
The craftsman's disc that has proved itself in millions of cutting operations.

All types of material found on the construction site, such as concrete, stone, roof tiles, sand-lime stone.

# GRINDING DISCS

## Product lines

For craftsmen or industrial use - three precisely co-ordinated product lines offer the right grinding disc for every user and every application. All discs comply with the relevant regulations, have a high specific grinding capacity and guarantee a maximum of safety.

### perfect line

The best-seller. Not only brilliant with its price/performance ratio. It has proven itself a million times. The perfect line shows best results on every angle grinder.

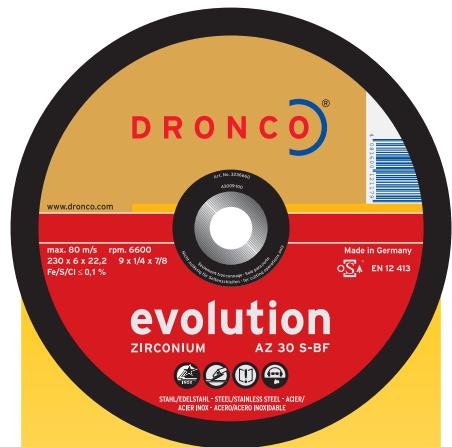

- resin bonded
- reinforced with glass fibre
- good lifetime
- good removal rate

### special line

Professional use needs for every application the right disc. Therefore abrasive grits and bonds match exactly the material - this increases the performance and minimises the working time.

- very good lifetime
- very „aggressive“ disc
- very good removal rate
- very good economic efficiency

### evolution line

The high end line for highest demands. These grinding discs have a brilliant lifetime and outstanding grinding efficiency at minimal effort.

- outstanding lifetime
- best raw materials
- maximum removal rate

**metal**

Grinding disc containing 25% zirconium. The perfect mixture of zirconium corundum and semi-friable fused aluminium oxide offers the following advantages:

- very high stock removal rate (even on stainless steel)
- great lifetime
- excellent price-performance-ratio

For stainless steel, high alloyed stainless steel, stainless sheet steel, non ferrous metals and cast.  
FE/S/CI  $\leq$  0,1 %.

# CERAMAXX

**OUR STRONGEST DISCS!**  
WITH CERAMIC GRAIN OF THE LATEST GENERATION  
GIVING AN ULTIMATELY INCREASED PERFORMANCE

- ▶ Durably aggressive removal performance = high productivity
- ▶ Lowest energy input = sparing for man and machine
- ▶ Quiet-running and smooth grinding = comfortable handling
- ▶ Cool grinding without thermal blueing = less rework
- ▶ Excellent lifetime = reduced disc consumption

| AK 36 T CeraMaxx  | evolution | metal | ★★★★   |
|---|-----------|-------|--|
|  <p>The Evolution AK 36 T is the first 3 mm grinding disc with ceramic grain which does not require a backing pad and which can simultaneously be used as a fully-fledged cutting disc. CeraMaxx discs are among the fastest, most aggressive and most durable on the market giving greatly increased productivity and efficiency with maximum removal rates and an unmatched speed of grinding performance.</p> <p>Ideal for users from pipeline engineering and construction, shipyards, metal engineering, foundries, commercial vehicle construction, steel construction, plant engineering, crane construction, construction machine production.</p> |           |       | <p>Combined grinding and cutting disc for the preparation and removal of welding seams, removal of welding splatter, descaling, rough deburring and grinding on stainless steel and steel. Fe/S/Cl ≤ 0,1 %.</p> <p><b>ceramic<br/>INSIDE 2.0</b></p> |

| AK 24 V CeraMaxx  | evolution | metal | ★★★★   |
|---|-----------|-------|--|
|  <p>High performance grinding disc with increased productivity and up to three times higher material removal compared to standard discs. Maximum aggressiveness with comfortable handling. Better efficiency thanks to an enormous lifetime. Excellent performance at low pressure.</p> <p>Ideal for users from pipeline engineering and construction, shipyards, metal engineering, foundries, commercial vehicle construction, steel construction, plant engineering, crane construction, construction machine production.</p> |           |       | <p>CeraMaxx grinding discs are ideally suitable for demanding grinding works: Preparation and removal of welding seams, removal of welding splatter, descaling, rough deburring and grinding on stainless steel and steel. Fe/S/Cl ≤ 0,1 %.</p> <p><b>ceramic<br/>INSIDE 2.0</b></p> |

## Some general information

The following information gives you the best possible overview about the features of our products.

### ① Description

A - normal corundum is the abrasive band for mild steel.

AZ - Zirconium corundum is the abrasive band for stainless steel.

AK - Ceramic grain is the new, self sharpening abrasive band for steel, stainless steel, high alloy steel, brass and bronze.

40 - indicates the grit size.

The higher the number, the finer the grit.

E.g.: 40 rough | 60 medium

80 fine | 120 very fine

### ② Product lines

perfect | evolution | special

Explanation see next page.

### ③ Yellow background

Is the colour coding for flap discs.

### ④ Safety standards

Our products comply with the highest safety standards and regulations:

EN 13743 - flap discs

OSA - organisation for the safety of abrasives

### ⑤ Measurements

Consist of (diameter of the disc)

x (bore size).

Measurements given in mm and inch.

### ⑥ Max. rpm.

Indicates the permitted maximum speed.

### ⑦ Red bar

Indicates 80 m/s as permitted peripheral speed.

### ⑧ Safety information

Cutting

## Product lines

For craftsmen or industrial use - three precisely coordinated product lines offer the right flap disc for every user and every application. All discs comply with the relevant regulations, have a high specific grinding capacity and guarantee a maximum of safety.

### perfect line

The best-seller. It has proven itself a million times. The abrasive band made of normal corundum enables a good material removal rate compared with a very attractive price.

- good material removal rate
- good lifetime
- very good price-performance ratio

### special line

Effective, long-lasting and economical. Flap discs from our special line with abrasive bands made of zirconium corundum are optimised for grinding on edges and surfaces in industrial use as well as for craftsmen - this increases the performance and reduces the working time.

- very good lifetime
- no clogging
- very good material removal rate
- easy working

### evolution line

The high-end line for highest demands. These flap discs offer outstanding lifetime, plus high removal rate with minimum effort.

- outstanding lifetime
- best raw materials
- outstanding material removal rate
- optimum efficiency

### Professional application

**Top product: extremely aggressive stock removal, outstanding service life, minimum effort**

### Demanding application

**Very good stock removal, high service life**

### Standard application

**Good stock removal, good service life**

You can get DRONCO flap discs in different performance classes - from a standard product for occasional use up to the high-end product for professional applications.

### Evolution AZ Maxx zirconium corundum flap disc

same advantages as AZA

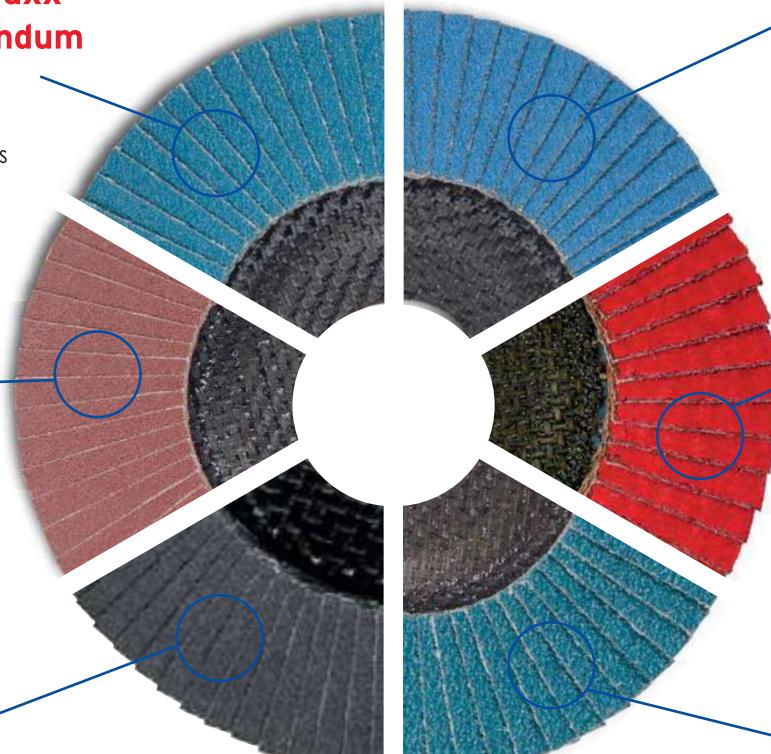

- increased height of lamellas
- steeper arrangement of lamellas
- aggressive material removal rate

### Perfect A normal corundum flap disc

- tough and hard abrasive grain
- good removal capacity, especially for surface work
- good service life

### Perfect C silicon carbide flap disc

- polyester backing
- very hard abrasive grain
- for stone treatment
- good removal rate

### Special AZ zirconium corundum flap disc

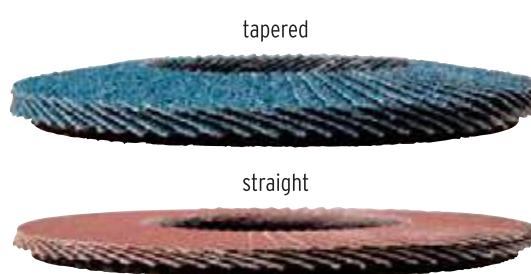

- abrasive grain is less hard, but very tough
- for working on edges and stainless steel
- brilliant grinding capacity
- outstanding service life

### Evolution AK ceramic grain flap disc

- self-sharpening
- robust polyester backing
- permanent extremely high stock removal
- cool grinding on surfaces and edges
- improved service life

### Special AZA zirconium corundum flap disc

- support of the abrasive band consists of a cotton twill
- for surface grinding on steel and stainless steel
- good grinding capacity
- outstanding service life
- no clogging up

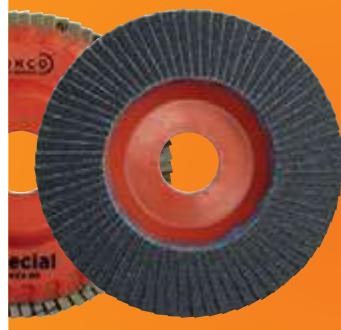

## ▼ Flap discs normal corundum

| G-A          | perfect   | Normal corundum   | ★★★☆☆                  |
|--------------|---|---|------------------------|
|              |  | <p>Reasonably priced product suitable for grinding steel and wood. Tough, hard abrasive grain permits good removal capacity, especially for surface work. The glass fibre backing is characterised by an even grinding finish until all of the abrasive grain has been worn away.</p> <p>Leaves no scratches on the workpiece.</p> <p>Packing unit: 10 pcs.</p> <ul style="list-style-type: none"> <li>● The best-seller with an excellent price/performance ratio.</li> <li>● Good stock removal in a wide range of applications.</li> </ul> | Steel, wood, aluminium |

J-AZ A

special

Zirconium corundum

★★★☆

Top flap disc with glass fibre reinforced plastic backing.  
Equipped with zirconium abrasive on a cotton-polyester cloth. High stock removal and service life.

Packing unit: 10 pcs.

| For steel and stainless steel.

- Quick to mount thanks to the integrated M 14 adaptor
- Air-cooled with cooling slots integrated in the backing
- Reinforced glass fibre plastic backing

|   |                | <p>This abrasive grain is less hard, but very tough, and gives the disc very good all purpose characteristics. It is used for such demanding operations as deburring, machining welding seams and breaking edges. The glass fibre backing is characterised by an even grinding finish until all of the abrasive grain has been worn away. Leaves no scratches on the workpiece.</p> <p>Packing unit: 10 pcs.</p> | <p>  Stainless steel, steel, cast, etc.</p> |              |                |                  |           |       |           |                  |             |             |       |    |          |            |        |             |             |       |    |          |            |        |             |             |       |    |          |            |        |             |             |       |     |          |            |        |             |             |       |    |         |            |        |             |             |       |    |         |            |        |             |             |       |    |         |            |        |             |             |       |     |         |            |        |             |         |       |    |          |            |        |             |         |       |    |          |            |        |             |         |       |    |          |            |        |             |         |       |     |          |            |        |             |         |       |    |         |            |        |             |         |       |    |         |            |        |             |         |       |    |         |            |        |             |         |       |     |         |            |        |             |         |      |    |          |            |        |             |         |      |    |          |            |        |             |         |      |    |         |            |        |             |         |      |    |         |            |        |

## G-AZ MAXX

## evolution

## Zirconium corundum

★★★★

The G-AZ MAXX flap disc is a high-end product for all users who recognise quality. Its increased number of lamellas ensures an even more aggressive material removal rate (steeper arrangement of lamellas) and a much higher lifetime than the AZ type. Improved tried-and-trusted topquality to optimize the efficiency of your tool. G-AZ MAXX means: Less downtime, more efficient working. Packing unit: 10 pcs.

For mild steel and stainless steel. For grinding on edges as well as surfaces. Ideal for sheet metal working, tank construction, metal construction.

- Increased number of lamellas for MAXXimum removal rate.
- Distinctly increased lifetime compared to G-AZ.
- Optimise the efficiency of your tool.

## ▼ Flap discs ceramic grain

| G-AK  | evolution   | Ceramic grain   | ★★★★ |
|---|---|---|------|
|  | <p>An innovative new flap disc with self-sharpening ceramic grain, which guarantees a permanent and extremely high stock removal as well as a long service life. The ceramic grain on this innovative abrasive cloth is fixed on a robust polyester backing. Fully resinoid bonded with fillers for active grind support guarantees the abrasion resistance of the ceramic grain especially under high pressure. Outstanding results when grinding on surfaces as well as on edges on mild steel or stainless steel. Due to the high load capacity ideally suitable for extreme grinding applications or special tasks for steel, stainless steel, titanium-base alloy, nickel-based superalloy, chrome-steel and chromium-nickel steel, brass and bronze.</p> <p>Packing unit: 10 pcs.</p> <p>3 times better than zirconium:</p> <ul style="list-style-type: none"> <li>▷ Improved stock removal and effortless working</li> <li>▷ Increased economic efficiency by noticeable time saving</li> <li>▷ Improved service life</li> <li>▷ Optimum Strength</li> <li>▷ Self-sharpening</li> <li>▷ Cool grinding on surfaces and edges</li> </ul> | <p>Sheet metal working, tank construction, cast iron, pipes and bars, metal constructions. Ceramic grain

★★★★

**JETceramic**

**High-End Product:** Flap disc with glass fibre reinforced plastic backing. Ceramic grain abrasive on polyester cloth. Fully resinoid bonded with fillers for active grind support. Self-sharpening ceramic grain for extremely high, permanently available stock removal as well as a long service life.

Packing unit: 10 pcs.

- ▷ Quick to mount thanks to the integrated M 14 adaptor
- ▷ Air-cooled with cooling slots integrated in the backing
- ▷ Reinforced glass fibre plastic backing

**For the processing of steel and stainless steel, high-alloy steels, chrome and chrome nickel steel, titanium alloys, brass and bronze.**

# CLEANING- AND POLISHING TOOLS

CLEANING- AND  
POLISHING TOOLS

## With the right material to highest perfection. The DRONCO POLISHING FLAP DISC.

The DRONCO polishing flap disc delivers outstanding results through an innovative, highly effective grinding fleece arranged in a fan-shaped lamella structure. Especially adjusted for working on stainless steel, steel, aluminium, and non-ferrous metals.

Depending on the texture of the fleece, DRONCO polishing flap discs are perfectly suitable for

- ▷ **Descaling and derusting work-pieces**
- ▷ **Preparing and repolishing welding seams**
- ▷ **Preparing surfaces for varnishing**
- ▷ **Polishing stainless steel**
- ▷ **Surface processing**

Available in three textures in dimensions of 115mm and 125mm.

- **Highly effective for the use in welding technology and metalworking**

Optimum results e.g. during the preparation of welding seems, the finishing of welding seams and removal of welding spillage in accordance with EN ISO 5817. Removes oxide film/annealing colours after welding of pipes, containers and apparatus or after the plasma-arc cutting of stainless steel sheet metals in accordance with DIN 50930, DIN 25410, DVGW W541.

- **Highly effective for the use in painting technology**

Perfect to derust, removal of colours and prepare of painting surfaces.

- **Versatile usage**

Cleaning and polishing of unalloyed steel, high alloyed steel, aluminium and non-ferrous metal. Suitable for grinding on edges and surfaces.

- **High service life**

# CLEANING- AND POLISHING TOOLS

## Polishing flap disc for angle-grinders

★★★☆

Outstanding for descaling and derusting of stainless steel, steel, aluminium and non-ferrous metal.  
Preparation and finishing of welding seams.  
Preparing of painted surfaces, polishing of stainless steel.  
Packing unit: 10 pcs.

Polishing flap disc for the efficient processing of metals.

| DESCRIPTION | DIMENSION MM | DIMENSION INCH | CONTENT PC. | ITEM CODE  | BAR CODE 4081600 |
|-------------|--------------|----------------|-------------|------------|------------------|
| G-VA Coarse | 115 x 22,23  | 4 1/2 x 7/8    | coarse      | 5511204100 | 550047           |

## Polishing flap disc set including 54 pc. in our special offer box

★★★☆

The innovative polishing flap discs in the attractive, self-explanatory special offer box. Contains 54 pc. with diameters of 115mm or 125mm. Optional also as mixed box including:  
3 x 9 pc. 115mm (coarse, medium, fine) and  
3 x 9 pc. 125mm (coarse, medium, fine)

Definitely a sales success - in the product shelf or on your sales counter.

## The innovation for polishing and cleaning The DRONCO POLISHING FLAP DISC

Grinding thin welding seams and removing thermal bluing

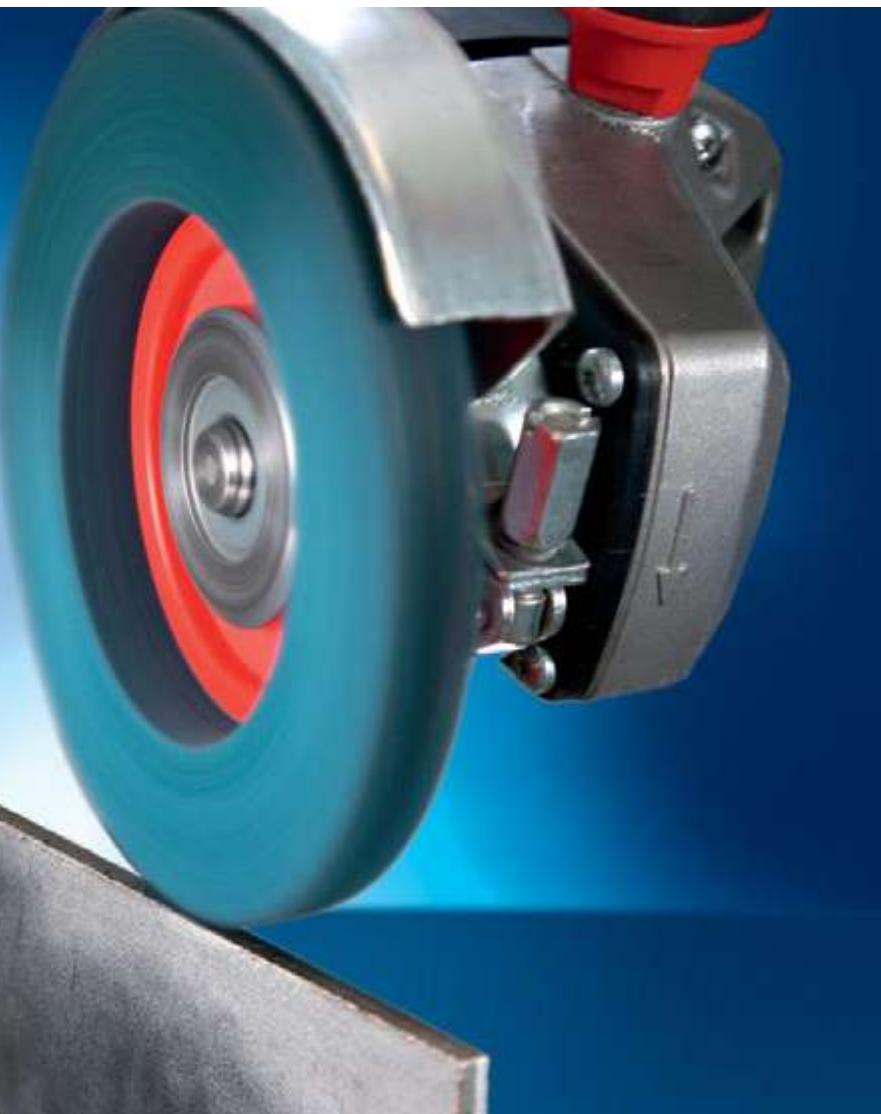

Professional derusting and descaling

Descaled surfaces prior to welding lead to clean welding seams

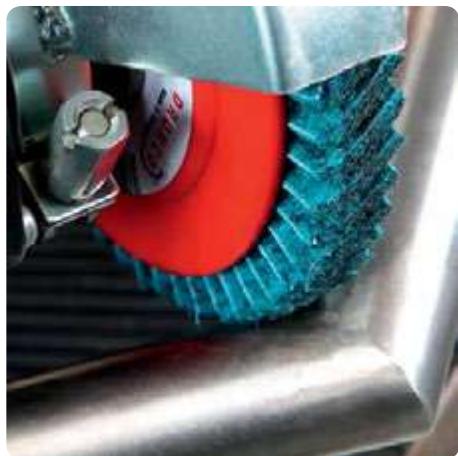

## A multi-talented performer for corners and angles

- ▶ the soft fleece hugs the surface of the workpiece to perfection
- ▶ flexible application for corners, angles, U-profiles, on rounded or flat surfaces
- ▶ fast and simple removal of rust, cleaning and blank polishing of metals
- ▶ cleaning, smoothing and polishing welded seams for corners, angles and fillet welds
- ▶ removal of temper colour, oxide layers or thin layers of paint on metals
- ▶ suitable for stainless steel, steel, aluminium and nonferrous metals

The new polishing wheel gives a perfect shine to corners, angles, rounded and flat surfaces.

It combines the outstanding performance of the polishing flap disc with an added bonus. The new polishing wheel is ideal for cleaning difficult-to-reach areas effectively and polishing them to a fine finish.

# CLEANING- AND POLISHING TOOLS

## Polishing wheel in an individual promotional pack

★★★★

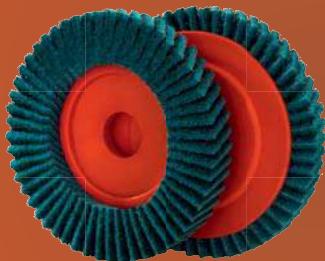

Polishing wheel with upright flaps made from high performance non woven material with a reinforced plastic backing. This flexible material hugs the work piece to perfection. It can be used both on the edge in corners, angles and rounded edges as well as on its face for flat surfaces. Suitable for the removal of rust, cleaning and blank polishing of work pieces made from stainless steel, steel, aluminium and non-ferrous metals. Cleaning and polishing of welding seams in corners, angles or fillet welds. Removal of any discoloration, oxide layers and thin layers of paint.

## ▼ Gloss polishing flap discs

### Gloss Polishing flap disc for angle-grinders

The G-VA finish completes the programme of the DRONCO Polishing flap discs. The disc is equipped with flaps made of high-quality special felt and is generally used with polishing compounds. This gives the work piece a mirror finish.

Packing unit: 1 pc. or 10 pcs.

For polishing metals using polishing compounds.

| DESCRIPTION  | DIMENSION MM   | DIMENSION INCH | STRUCTURE | CONTENT PC.           | ITEM CODE  | BAR CODE 4081600 |

### Polishing compound, single, 110 Gram

Polishing compound white = pre-polishing steel and stainless steel.

Polishing compound brown = pre-polishing of non-ferrous metals

Polishing compound blue = gloss-polishing.

| DESCRIPTION              | DIMENSION GRAM | CONTENT PC. | ITEM CODE  | BAR CODE 4081600 |
|--------------------------|----------------|-------------|------------|------------------|
| Polishing compound white | 110            | 1           | 6400403000 | 707328           |
| Polishing compound brown | 110            | 1           | 6400402000 | 707311           |
| Polishing compound blue  | 110            | 1           | 6400404000 | 707304           |

## Recommended use:

- To start, process the work piece with the coarse G-VA Polishing flap disc followed by fine.
- The Gloss Polishing flap disc is always used with a corresponding polishing compound.
- Step 1: Start with a white or brown pre-polishing compound.
- Step 2: Use a new Polishing flap disc with a blue high-gloss polishing compound in order to obtain a high-gloss surface.
- For the polishing of aluminium and non-ferrous metals, use a brown polishing compound especially for these materials.
- With a reduced working speed of 4.500 rpm, better polishing results are achieved than with the angle grinder at full speed.

# CLEANING- AND POLISHING TOOLS

**Brilliant results in 3 steps**  
with our 10 pcs. Professional Polishing System

**1**

**Pre-Polishing with Sisal cloth and polishing compound:**

- ▷ white for stainless steel
- ▷ brown for non-ferrous metals
- ▷ most important step after grinding
- ▷ high stock removal

**2**

**Polish with Notiflex® 914 in conjunction with polishing compound:**

- ▷ white for stainless steel
- ▷ brown for non-ferrous metals
- ▷ hard cloth
- ▷ even surface

**3**

**Mirror-finishing with Notiflex® 925 in conjunction with blue polishing compound**

- ▷ short process time
- ▷ light contact pressure

## Polishing System, 10 pcs.

For use on drilling machines, flexible shafts, angle polishers and stationary polishing stands for ultimate polishing in 3 steps.

### Content of package:

6 Cloth discs: 2 x Sisal cloth, 2 x Notiflex® 914, 2 x Notiflex® 925  
3 x polishing compound (white, brown, blue)  
1 x drive arbor

Processing on pots, processing on mountings, automotive industry, builder's hardware

| DESCRIPTION      | DIMENSION MM | SPEED R.P.M. | ITEM-CODE  | BAR CODE |
|------------------|--------------|--------------|------------|----------|
| Polishing System | 100 mm       | 4000         | 6900003100 | 4081600  |

## PLEASE OBSERVE

**Notiflex®: High quality randomly-placed fibre.**

**Advantages:** no seams, little heating, 30 % less polishing compound use in relation to commercial polishing buffs. Not suitable for work on edges!

## ▼ Coarse cleaning fleeces

Dronco cleaning fleeces produce optimum results when used to grind and rub down metal, stainless steel, wood or plastic surfaces and can be used as a preliminary stage before polishing. They are made of intertwined nylon fibres which are then immersed in synthetic resin and gently hardened. They are available with a glass fibre backing or for the use with straight or cylindrical grinders.

### Coarse cleaning fleeces for the use on angle-grinders

Suitable for cleaning and polishing all surfaces.

Packing Unit: 10 pc.

**Removal of old paint, rust and welding splatter without scratching the surface of the work-piece, cleaning and smoothing wood and plastic, polishing of stainless steel and removal of thermal bluing.**

| DESCRIPTION     | DIMENSION MM | DIMENSION INCH | SPEED R.P.M. | CONTENT PC. | ITEM CODE  | BAR CODE 4081600 |

| Cleaning fleece | 180 x 22,23  | 7 x 7/8        | 8500         | 10          | 6700003100 | 670158           |

### Coarse cleaning fleece set including 36 pc. in our special offer box

Our coarse cleaning fleece in the attractive, self-explanatory special offer box. Mixed box contains 18 pc. 115mm, and 18 pc. 125mm with fibre backing.

**Definitely a sales success - in the product shelfe or on your sales counter.**

| DESCRIPTION | DIMENSION MM      | DIMENSION INCH  | CONTENT PC. | ITEM CODE  | BAR CODE 4081600 |
|-------------|-------------------|-----------------|-------------|------------|------------------|
| Mixed box   | 115 / 125 x 22,23 | 4 1/2 / 5 x 7/8 | 2 x 18      | 6700012100 | 683349           |

#### PLEASE NOTE

This product is also suitable for battery-powered angle grinders in diameters 115 and 125 mm.

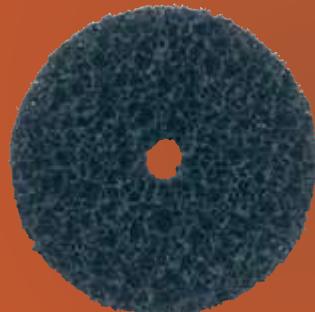

# CLEANING- AND POLISHING TOOLS

## PLEASE OBSERVE

**Coarse cleaning fleeces are designed to be used flat - they are not suitable for grinding or cutting.**

### Coarse cleaning fleeces for straight and cylindrical grinders

Suitable for cleaning and polishing all surfaces. The use on straight or cylindrical grinders happens with a tensioning shaft.

Removal of old paint, rust and welding splatter without scratching the surface of the work-piece, cleaning and smoothing wood and plastic, polishing of stainless steel and removal of thermal bluing.

## More grinding luxury for your customers The coarse cleaning fleece with best results during test

For better depiction, the guard of the angle-grinder was removed for picture taking.

Please make sure to use the coarse cleaning fleece on your angle-grinder with appropriate safety precautions only.

## The Label - briefly explained

The label of the diamond blade contains all important information about the product.

### ① Description

Consists of the purpose and performance class (3 / 4 / 5 / 7): e.g. U5

**U** – Universal

**S** – Stone Plates

**F** – Tiles or Stoneware

**B** – Concrete

**G** – Granite and Hard Stones

**A** – Abrasive Stones and Asphalt

**AM** – Mortar Raking

### ② Product Lines

perfect | superior | evolution | xtreme

More details on page 91.

### ③ Safety Standards

Our products comply with the highest standards and regulations:

EN 13 236 – diamond tools

OSA – The Organization for the Safety of Abrasives

### ④ Dimensions

Consist of [diameter of the blade]

x [thickness of the segments]

x [bore size].

Dimensions given in mm.

### ⑤ max. RPM

Indicates the permitted maximum speed.

In this example 6600 rpm.

### ⑥ Directional Arrow

Indicates the direction of rotation of the blade.

### ⑦ Red Bar

Indicates 80 m/s as permitted peripheral speed.

### Green Bar

Indicates 100 m/s as permitted peripheral speed.

### ⑧ Safety Information

For your own safety. Please observe!

we are always there when you need us!

# DIAMOND CUTTING DISCS

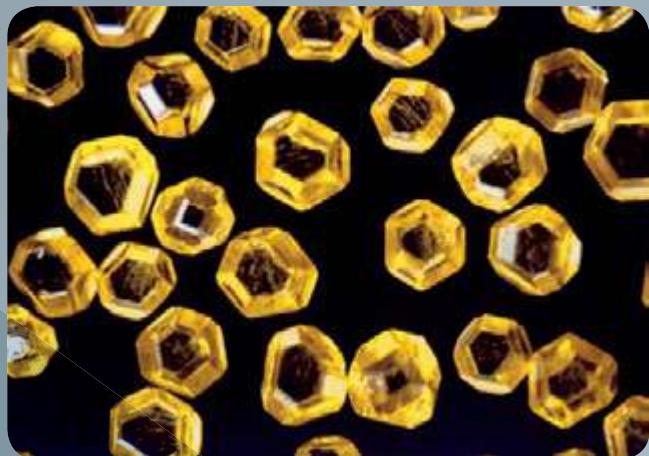

THE RIGHT TOOL  
FOR EVERY TASK

DIAMOND  
CUTTING DISCS

## Many years of experience for best quality

Diamond tools have been part of our range for more than 30 years. During this period an in-depth knowledge has been achieved, which our customers benefit from.

## Innovation

Always one step ahead

Our R+D team is working in modern laboratories on future-oriented technologies for abrasive tools, resulting in product innovations and a continuous improvement of existing products with regard to cutting ability, lifetime, speed and precision. As a result, significant performance improvements of more than 30 % in the sector of diamond tools have been achieved in the past few years.

## Diamonds

DRONCO relies on synthetic diamonds

The diamonds are responsible for the actual cutting work of the tool. DRONCO uses synthetic diamonds which have the same degree of hardness as natural diamonds. In comparison to their natural counterparts, they offer the advantage of an ideal structure that always remains the same. Both grain size and the crystalline shape of the diamonds are adjusted to the optimum parameters for the respective field of application in order to achieve perfect cutting abilities and a high lifetime.

## Highest Safety Standards

In terms of safety and quality, DRONCO diamond cutting blades are manufactured and tested according to the latest standards, regulations and norms. Our quality management system ensures that we meet the high demands of a modern, worldwide acting industrial enterprise on all levels. Certification in accordance to DIN EN ISO 9001:2008 is therefore just as normal as our oSa membership (Organization for the Safety of Abrasives).

## Tested Safety According to EN 13 236 and oSa

### EN 13 236

European safety standard for diamond tools

### oSa

The Organization for the Safety of Abrasives

# OUR PRODUCTS SAFETY FIRST!

Being a member of oSa, we do everything to make our abrasive tools as secure as possible.

## Core Geometry

Introducing the various core shapes used for our diamond cutting blades.

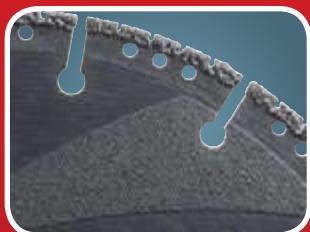

### Standard Segmentation (C3)

- narrow gullet
- small slots with slot holes

### Continuous Rim (GRF)

- stable running
- cutting edges without chipping

### Standard Segmentation Diamond Brazed

- small slots with slot holes
- segments directly coated with diamonds in a vacuum-process
- good discharge of material

### Continuous Turbo Rim

- stable running
- clean cut without chipping

### Turbo Segmentation (C3)

- small slots with slot holes
- aggressive fast cut
- higher lifetime

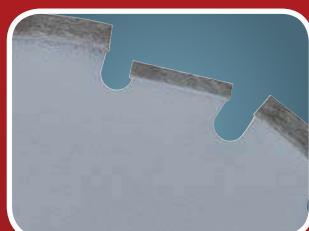

### Wide Segmentation (C1)

- normal gullet
- wide slots
- good discharge of material

### Speed Segmentation (C3)

- narrow gullet
- small slots with slot holes
- aggressive fast cut
- outstanding lifetime, no cooling breaks
- suitable for cutting metal

### Wide Segmentation with Core Guard Segments (C1S)

- normal gullet
- wide slots
- good discharge of material
- core guard segments to protect the core as well as to prevent undercutting

## VIBRATION AND NOISE CAN BE REDUCED EFFECTIVELY

Our "Protect" blades are using special sandwich steel cores which are reducing vibration and noise noticeably during the cutting operations.

# DIAMOND CUTTING DISCS

## Diamond Segment

The ideal material for all fields of application

The bond of the individual segments is the carrier of the synthetic diamonds. The high-tech bonds are specifically adapted to their respective field of application in order to ensure both the best results possible and the optimum wear of the bonds. The cutting ability and the lifetime of a blade do not depend on the highest concentration, but rather on the proper amount of diamonds and the composition of the bond:

**Hard Material → Soft Bond**

**Soft Material → Hard Bond**

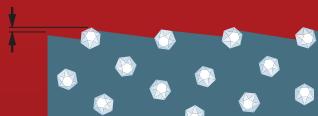

### Poor - excessive wear of the bond

The diamond grain separates prematurely, resulting in a shortened lifetime.

### Poor - insufficient wear of the bond

The diamond grain is polished or broken off on the bond level. New diamonds cannot be released and the blade loses its cutting ability.

### Perfect - optimum wear of the bond

The diamond grain is evenly released. The blade maintains its cutting ability and achieves an ideal lifetime. The trail of the bond perfectly supports the diamond grain and ensures an optimum cutting ability.

## Steel Core

Made of hardened and balanced tool steel

## Segment Bond

Joins the steel core and the segment

There are two methods for permanently joining the diamond segments and the steel core:

### Laser welding

This method is characterized by the fact that the diamond segments are permanently welded to the high-quality steel core. As segment losses can almost be completely excluded, this method ensures the best operational safety possible.

### Sintering

During this process, the segments are sintered to the steel core by applying high pressure and temperature.

## DRY CUTTING BLADES

DRONCO diamond cutting blades for dry cutting can be used for wet cutting as well without any concern.

## WET CUTTING BLADES

DRONCO diamond cutting blades for wet cutting may only be used on water-cooled machines!

## Strong content - Strong outfit

We think a top product needs an appealing packaging. That's why DRONCO does not use a random solution, but a carefully thought out, eye-catching outfit to inform and convince our customers visually and haptically.

The outstanding product quality and high-class brand image will help to showcase you as a distributor as well. Our self-explanatory packaging facilitates the consulting of your customers and therefore improves the sales.

### Completely Protected

The carton sleeve with closed sides protects the product ideally.

### QR Code

Learn more about the product by scanning the QR code on the packaging.

### Colour Coding System

Six colours ensure a quick orientation. Read more on page 92.

### Clear View on the Product

Most of the steel core and the diamond segments are visible.

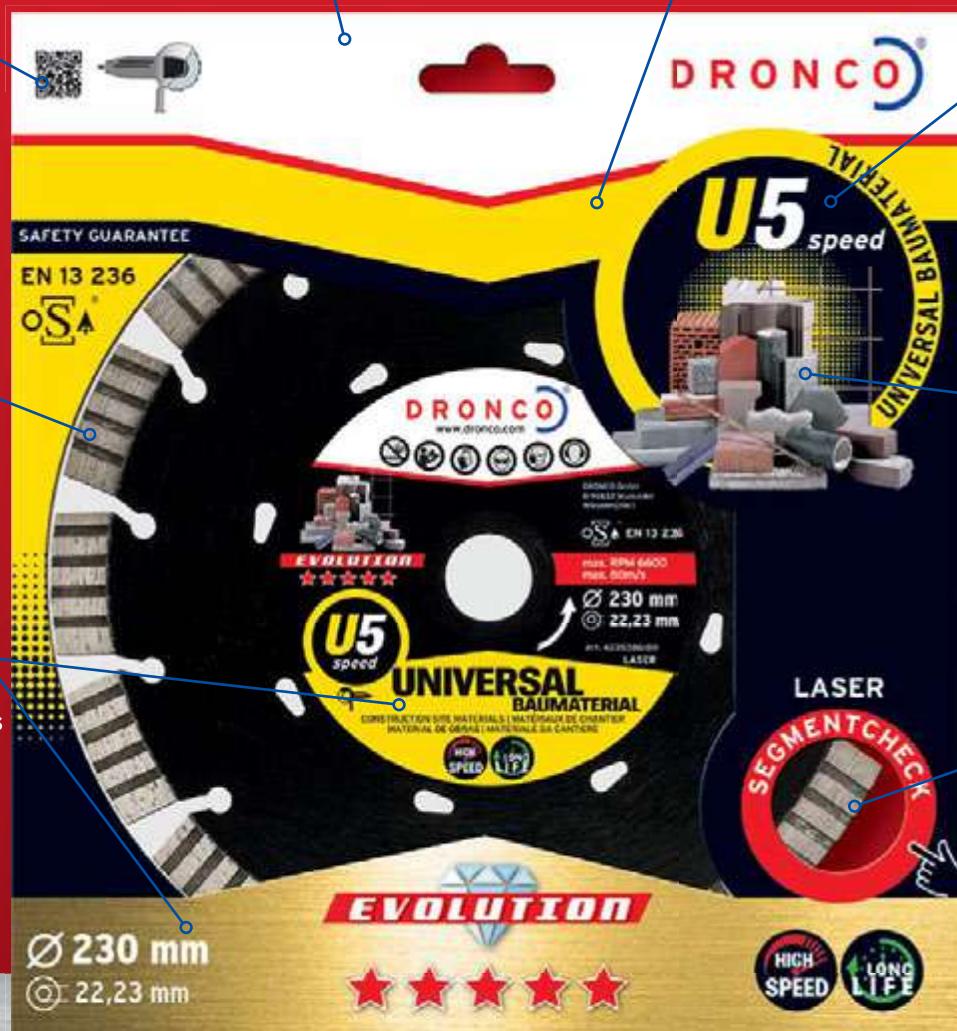

### Clear Information

All relevant information on the product as well as the packaging are easy to comprehend.

Multilingual recommendations of application can be found on the reverse of the packaging (16 languages).

### Concise Description

The product name consists of purpose, product line and additional features.

### Illustrated Application

Recognize the field of application at a glance.

### The Segment Check

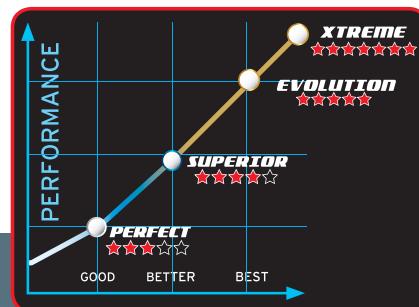

"Feel the Power". The cut out packaging allows you to "feel" the diamond segments.

# DIAMOND CUTTING DISCS

## Our Product lines - For all demands

Three quality lines based on the good-better-best-principle: From the solid craftsmen quality, which is used by semi-professionals as well, to the absolute high-end tools for the intensive use on construction sites; DRONCO has the right tool for all demands.

**BEST**

High performance diamond cutting blades for the professional user to meet high expectation on demanding application. Maximum cutting speed and outstanding lifetime. Wide range of application. The Evolution and Xtreme line can be recognized by their gold labels and 5 or 7 stars.

**BETTER**

Premium tools for the professional user. Effective, durable and economical. Convincing in daily use thanks to their fast cutting speed and good lifetime. Outstanding price-performance ratio. The Superior line can be recognized by its blue label and 4 stars.

**GOOD**

The economically priced assortment for many different tasks in approved craftsmen quality. Good lifetime and fast cutting speed at an attractive price. For users who place the emphasis on quality but don't need a high-performance tool for continuous use. The Perfect line can be recognized by its silver label and 3 stars.

## The right cutting blade found instantly

Our colour coding system on the packaging of the diamond cutting blades features six distinctive colours, each for a different field of application. Additionally the materials which the blades are suitable for are illustrated on the carton sleeves. Thanks to the detailed application chart, you can easily determine which diamond cutting blade is the best choice for your field of application.

## COLOUR CODING SYSTEM:

### Universal

Yellow

### Concrete

Green

### Tiles/Stoneware

Turquoise

## DO YOU NORMALLY CUT THE SAME OR DIFFERENT TYPES OF MATERIAL?

### Same material

We recommend using the following blades:

A4, B4, B5 and G4

### Different materials

For applications with a wide range of materials we recommend using the following blades:

U3, U4, U4 speed, U4 protect, DB4, U5 speed, U5 protect and U7 speed

## Stone Plates

Orange

## Granite and Hard Stones

Navy Blue

## Abrasive Stones and Asphalt

Red

## WHEN SHOULD YOU USE A BLADE WITH A CONTINUOUS RIM?

If you want to cut materials where a clean cut is required (e.g. tiles, glazed bricks, stoneware), we recommend you to use one of the following blades:  
S3 turbo, S5 turbo, S5 turbo protect, F3, F4 cera and F5 cera speed

The continuous rim prevents the edges from chipping, guaranteeing a brilliant cutting result. Blades with a continuous rim should only be used up to a cutting depth of 2 cm when cutting dry.

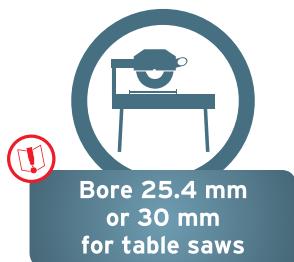

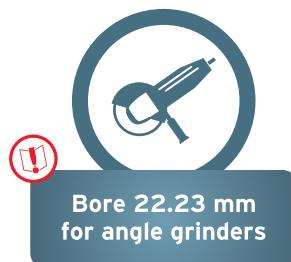

### Application chart of diamond cutting blades

In the application chart you will find the diamond blades pre-sorted according the field of application.  
You can see which disc is most suitable for different material.

## On which type of machine can the blades be used?

These information can also be found in the descriptions of each type on the following pages.

# DIAMOND CUTTING DISCS

Application chart of diamond cutting blades

|  | Porous concrete | Gneiss | Granite | Cast up to 5 mm | Sand-lime stone | Limestone | Clinker,<br>Engineering bricks | Marble | Paver | Porphyry | Sandstone | Slate | Steel up to 3,5 mm | Terrazzo | Exposed aggregate<br>concrete | Bricks |

You can get DRONCO Diamond cutting discs in different performance classes - from a standard product for occasional use up to the high-end product for professional applications. On the following pages you will always find the corresponding symbol for the respective performance class of the tools in the heading of each type.

## PROFESSIONAL APPLICATION

High-end product: extremely fast cutting,  
outstanding lifetime, minimum effort

## DEMANDING APPLICATION

Very good cutting performance, high lifetime

## STANDARD APPLICATION

Good cutting performance, good service life

## Universal | Construction site materials

# DIAMOND CUTTING DISCS

**U4**

**superior**

**Dry and wet cutting**

**★★★★★**

Laser welded, segmented blade designed to cut construction site materials dry or wet. Maximum safety and very good cutting results at a reasonable price.  
Packing unit: 1 pc.

Construction site materials,  
e.g. concrete, exposed aggregate  
concrete, border stones.

**superior**
**Dry and wet cutting**

The all-round product with a voracious appetite for cutting - for universal use in a broad range of applications on construction sites or by emergency services. The steel blade is directly coated with diamonds in a special vacuum process.

Packing unit: 1 pc.

Very good cutting abilities in many materials such as artificial and natural stone: concrete, reinforced concrete, exposed aggregate concrete, concrete paving, Indian granite, quarry slabs, granite slabs, sandlime stone, bricks. Metals: iron constructions and iron profiles, cast iron, sheet metals, non-ferrous metals, ductile pipes. Plastics, fibreglass, carbon fibre, wood, rubber, etc.

Ø 115 &amp; 125 mm

# DIAMOND CUTTING DISCS

**U5 speed**

**evolution**

Our bestseller: Laser welded all-round cutting blade with speed segments for an ultimately fast cutting speed and clean cutting edges. Excellent universality, outstanding lifetime. Can be used for soft, abrasive stones as well as hard natural stones. No cooling brakes needed.  
Packing unit: 1 pc.

**Dry and wet cutting**

★★★★★

All kind of construction site materials, e.g. basalt, concrete, reinforced concrete, cotto, ductile and cast pipes, gneiss, granite, clinker bricks, porphyry, exposed aggregate concrete, bricks, etc.

**Top class all-round product!**

- ▷ aggressive laser welded speed segments
- ▷ high-performance diamonds
- ▷ no cooling brakes
- ▷ outstanding cutting speed
- ▷ extremely high lifetime

## U5 protect

## evolution

Laser welded all-round diamond disc with a special sandwich steel core, which reduces vibration noticeably and noise by 50 %. The segments are made of high performance diamonds and a bonding designed for extremely high cutting speeds. Clean cutting properties and a very good lifetime are also features of this product. The field of applications ranges from hard to soft materials, abrasive materials, as well as reinforced materials. The disc can be used without cooling brakes.

Packing unit: 1 pc.

Do you know the latest legal regulations based on the EU guidelines for protecting workers from noise and vibration? The U5 protect allows responsible employers to provide their staff with tools, which significantly reduce health damaging factors in the work environment. A reduction in noise level by minus 10 db(A) = halving the volume. The U5 protect features an extraordinary high-tech steel core, which reduces the sound level by 50 %. This also makes the experience of the cutting procedure around the construction site much more pleasant. Another bonus for the operator is the noticeably lower vibration level. These two factors add up to important protection for the health of the operator. And this is achieved with no loss in performance. The U5 protect offers outstanding cutting speed and the lower vibration level also reduces wear and tear on the segments - increasing the lifetime of the product.

### 50% less noise, noticeable less vibration

- ▷ high-performance diamonds for outstanding cutting speed
- ▷ excellent lifetime
- ▷ no cooling brakes
- ▷ noise and vibration reduced

## Dry and wet cutting

All kind of construction site materials, e.g. concrete, reinforced concrete, exposed aggregate concrete. Usable for hard stones, gneiss, granite, clinker bricks, porphyry, bricks, ductile and cast pipes etc.

**Dry and wet cutting**

★★★★★

All kind of construction site materials, e.g. concrete, reinforced concrete, exposed aggregate concrete. Usable for hard stones, gneiss, granite, clinker bricks, porphyry, bricks, ductile and cast pipes etc.

The new U7 speed sets standards and combines all the features a top all-round disc can offer:

- Extremely high cutting speed thanks to its innovative segment technology with geometrically arranged high-performance diamonds. Segments and bond have been optimized for an optimum cutting speed and universal use.
- Flat 15 mm segments with compact volume, a high diamond density and an optimized bond ensure an outstanding lifetime during the daily all-round use.
- Effortless cutting without physical exertion.

# DIAMOND CUTTING DISCS

S5 turbo

evolution

Dry and wet cutting

★★★★★

The premium turbo blade from DRONCO. The new type of 9 mm castle segments and a smooth, perforated stainless steel core are the prime features of this product. With this turbo blade you don't have to worry about limitations to the cutting depth. Smooth running, excellent all-round qualities, outstanding lifetime and clean cutting edges make this product a real all-rounder on any construction site. Especially for roofers and garden and landscape construction.

Packing unit: 1 pc.

Professional turbo blade also suitable for thicker stone plates. Very good cutting results and lifetime in concrete, concrete roofing slabs, gneiss, granite, terrazzo, bricks, roofing tiles.

# DIAMOND CUTTING DISCS

## F5 cera speed

## evolution

## Dry and wet cutting

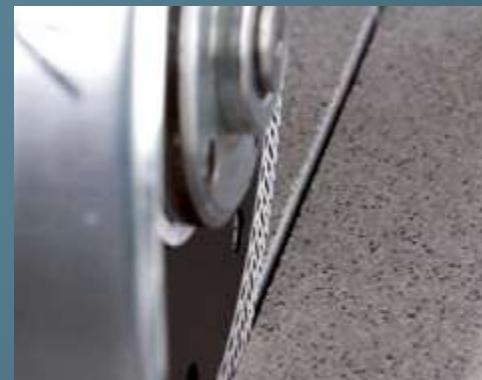

Thanks to its thickness of only 1.2 mm and the special geometry of the continuous rim, the F5 cera speed ensures both, an exceptional cutting speed and a comfortable and smooth operation. The 10 mm segments guarantee an optimum lifetime. The integrated flange around the bore makes sure that the blade can be used safely in every situation.

Packing unit: 1 pc.

- 1.2 mm thin cutting rim with special geometry
- clean cutting edges
- minimal material loss
- exceptionally fast cutting
- easy to use
- 10 mm segment height

For cutting quarry tiles, stoneware and granite slabs.

# DIAMOND CUTTING DISCS

B5

evolution

Dry and wet cutting

★★★★★

Laser welded top-class product with aggressive high-performance diamonds. Extremely fast, effortless cutting. For professional use in all sorts of concrete, even with reinforcement. No cooling brakes needed.

Packing unit: 1 pc.

- ▷ best cutting abilities for a fast work progress
- ▷ excellent lifetime
- ▷ no cooling brakes

Concrete, cotto plates, exposed aggregate concrete, composite concrete paving, concrete roofing tiles, terrazzo.

## Diamond tile drill CeraDrill

The new Dronco CeraDrill drill-bits with vacuum-brazed diamond coating for maximum drilling performance.

They are used where conventional carbide or diamond drills reach their limits. The CeraDrill drill bit has an integrated cooling liquid that is released during the drilling operation.

Water cooling with its inconveniences is no longer necessary. Work efficiently and cleanly with CeraDrill.

With  
vacuum-brazed  
diamond  
coating

- Integrated cooling liquid
- Simple and efficient working
- No water cooling required
- For tiles, stoneware, quarry tiles

### CERADRILL DIAMOND TILE DRILL

The drills are supplied with a protective cap. The cap has to be removed before the first use. After completion the cap must be refitted.

| For tiles, stoneware and quarry tiles.

| ITEM CODE  | BAR CODE |
|------------|----------|
| 4000601100 | 4081600  |
| 4000602100 | 400809   |
| 4000604100 | 400816   |
| 4000605100 | 400830   |

| 4000607100 | 400854   |
| 4001100100 | 400861   |
|            | 400939   |

Packing: 1 pcs in plastic box, including cleaning stick

**Only for drilling without hammer! Optimal speed = 1500 rpm.**

#### Operating instructions:

- Remove the protection cap.
- Start the drilling at an incline, then move to horizontal.
- Use the drilling aid for vertical drilling.
- Remove dust.
- Work with rotatory moves.
- A cooling break of 2 minutes is required after every hole.
- Clean the head after every hole with the cleaning stick provided (push dirt and dust inside the drill).
- When you have finished the application, refit the protective cap onto the drill.

#### Advice:

We recommend a trial drilling in a tile before you make a drilling operation in an already tiled bathroom!

#### CERADRILL-SET | ALUMINIUM CASE WITH 5 CERADRILL DRILL BITS, DRILLING AID AND CLEANING STICK

For tiles, stoneware and quarry tiles.

## DRONCO 1-2-3-System for manual sanding - easy to handle and effective!

### Ergonomic Hexagon Sander

#### Hexagon Sander Set 150 x 75 mm

#### Dronco 1-2-3 System

#### Hand sanding

The DRONCO 1-2-3 Hexagon Sander set is also available with 50 abrasive sheets, assorted in three different grits ( 20 x K80, 20 x K120, 10 x K220)

With its ergonomic shape, the Hexagon Sander is the perfect tool for all sanding projects. It enables an especially easy-to-handle, smooth and effective sanding of larger surfaces that also reaches into corners, areas which are hard to access or on longer edges. The ideal tool for the restoration of furniture and for various sanding works for example on wood, fibreglass, plasterboard, metal or varnished surfaces.

The DRONCO 1-2-3 Hexagon Sander set contains six abrasive sheets in three different grits. The abrasive sheets can be used on both wood and on metal.

Ergonomic manual sanding system for wood, metal, plastics, varnished surfaces and many more.

## DRONCO 1-2-3-System for manual sanding - easy to handle and effective! Sanding Sponge Set

### Sanding Sponge Set with Handle

### Dronco 1-2-3 System

### Hand sanding

This handle allows the comfortable use of Sanding Sponges – without having to hold the sanding sponge in your hand.

The Sanding Sponges adjust to the processed surface very well and enable a smooth grinding.

- ▶ 1x Coarse Sponge grit 80, suitable for removing varnish and paint
- ▶ 2 x Medium Sponges grit 120, suitable for grinding of hard and soft wood, residue for plasterboard, fibreglass or metal surfaces
- ▶ 1x Fine Sponge grit 220 for the optimum grinding of surfaces before the application of a paint, glazing or varnish coating as well as before the oiling of furniture with teak oil or other liquid wood waxes.

Ergonomic manual sanding system for wood, metal, plastics, fibreglass, varnished surfaces, plasterboard and many more.

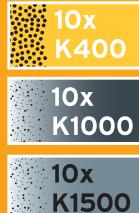

The DRONCO 1-2-3 Sanding Sponge set contains the ergonomic Handle plus four Sanding Sponges in three different grits (80, 120, 220). The Sanding Sponges can be used for multiple purposes.

## ▷ Semi-flexible discs for use on angle grinders

Because of the special disc build-up of the Semi-flexible discs a higher grade of removal is reached than with fibre discs, however with a coarser finish. They are available with normal corundum and silicon carbide.

Attention: A backing pad is necessary.

Speciality: Description SC 24 is also used for care of hoofs.

# FLEXIBLE AND SEMI-FLEXIBLE ABRASIVES

## Backing pads for use on angle grinders

For fibre discs and semi-flexible discs. The backing pad by DRONCO takes care of the proper support on the machine. Best possible working conditions and efficient, fast working are thus guaranteed.

**Backing pad**

**Angle grinder**

Safety when using fibre and semi-flexible discs. Good scratch pattern due to damping and flexibility of the backing pad.

## ▼ Grinding cups

The high removal rate of these conical abrasives makes them the ideal solution for coarse grinding work. The maximum operating speed should not exceed 45 m/s.

Examples of possible applications:

- **cleaning of shutter boards**
- **grinding away concrete ridges after the removal of the formwork**
- **coarse grinding work in the metal-working industry**

### PLEASE NOTE

**Max. R.P.M. 8500 - 50 m/s**

### Grinding cups metal

Suitable for all angle-grinders. Available in fine, medium, coarse.

Coarse grinding work on metal. The slight angle of the grinding cup also allows to work on welding seams.

# YOUR FIRST CHOICE FOR ALL SURFACES

BRUSHES

14

Dear customers,

you can look at it whatever way you want ...

On approximately 300 pages our new catalogue presents the range of products for mechanical surface treatment from Osborn and Dronco. No matter if you are looking to cut, grind, sand, clean, brush or polish – we are at your service.

We are Osborn and Dronco. With a combined experience of more than 180 years in surface treatment we do have a solution for nearly everything. And in case we don't have it yet, we develop it together with you. This is our strength: We already have 10,000 solutions for standard applications on stock. In addition we have developed more than 100,000 tailored solutions for our customers. And we also gladly assist you in finding the right product.

If today you are only an Osborn customer, we invite you to getting to know the other part of us. Just turn the catalogue around and see what Dronco has to offer. And the great thing is: You don't need another customer ident number or an additional contact person. Just speak to your already known contact and order products on you already existing customer account. Give it a try.

**We are looking forward to our further cooperation!**

# BEST SERVICE AT ALL LEVELS

## Service means just that - serving.

It's not just a matter of dependable ordering, attractive conditions and fast delivery. We have that already, of course. **We offer our customers a 100% service.**

Therefore service at Osborn starts very early on.

## Good service starts with a good product.

A good tool just feels right and fits 100% to the machine you are using. That's why we place great value on the ergonomics and handling of our products. Osborn tools are designed to suit all common machines and are also tested thoroughly on them.

**Good service for us means developing products that make your work easier.**

In our R&D lab, we use latest technology to achieve maximum ease of use and safety.

## Tailored solutions for you.

We develop products that perfectly suit the needs and demands of our customers. It doesn't matter whether they're from our huge standard range or the result of a customer-specific solution developed jointly with you.

**Our aim is to always make the user's work easier.**

## Our packaging as our best salesman.

A lot of information has to be taken in and considered at the self-service shelf and on the packaging. We favour clear messages, easily understood self-explanatory information. Well designed packages can help customers to find the right product and save consultation time on the dealer's part.

No matter when or where, you can place your order and we see to a timely delivery.

## 24/7 availability, worldwide.

Quick response and delivery times are a fundamental element of a modern service/customer relationship.

For you as a dealer, this is the basis for a good and profitable business partnership. In addition things must also be easy and reliable.

nexMart offers its dealers the convenience of an online order platform and is available in many European countries for some time now.

Bienvenue ! Welkom! Welcome! Willkommen!

# A QUESTION OF SAFETY

### Work safety – a key issue for users and dealers.

That's why Osborn takes the subject very seriously. Users and dealers are safe with us because many **Osborn tools** are **TÜV-certified**. This means safety is not only perceivable but also measurable.

### Safety with a seal. More than 700 Osborn products are TÜV-certified.

Osborn quality is not just a promise but is signed and sealed. More than 700 of our products have been certified by TÜV-Süd. This makes Osborn products the only ones on the market to meet the highest standards of quality and safety.

#### Our quality standard: to always have the best tool for every job.

That is why we combine top-quality raw materials, years of experience, high-precision manufacturing methods so our customers can rely on Osborn.

#### Osborn: Officially good!

A TÜV-seal means „tested without compromise“ and indicates quality at the first glance.

Osborn is the only manufacturer in its sector to obtain this certification.

One of more than 700 certified Osborn products.

The package shows that this article is TÜV-certified.

### Visible quality.

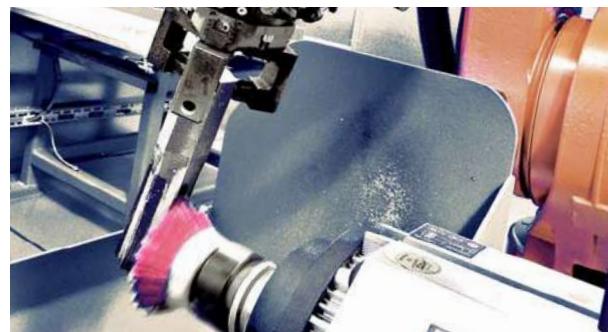

The TÜV-seal on the packaging catches the eye immediately. Clearly visible on the shelf, the seal tells consumers immediately that Osborn quality has gained official confirmation.

### Unique tool. Repeated testing.

All products undergo a wide variety of tests for TÜV-Süd certification.

In addition to these checks, all our products are subjected to our own comprehensive tests in order to guarantee the Osborn quality standard.

Our customers benefit time and again from double quality testing which ensures consistently high standards in terms of materials, finish and safety.

### Certified quality - compliance with all standards.

In addition to meeting the demands for the TÜV-Süd certification, our products are also manufactured in accordance with EC standards EN 1083-1 and EN 1083-2. We also hold the DIN EN ISO 9001:2015 certification and have implemented into this an energymangement system according to ISO 50001:2011.

You can find our certificates on our website at:  
[www.osborn.de/de-de/service/zertifikate.html](http://www.osborn.de/de-de/service/zertifikate.html)

With its TÜV certification, Osborn promises more than just a quality commitment. Osborn products have proven they perform as promised. Under all conditions.

This clearly makes Osborn the first choice when it comes to superbly manufactured tools of unbeatable quality.

# YOUR ADVANTAGE EXKLUSIVELY WITH OSBORN

# MAXIMUM QUALITY

## First class tools – better results and satisfied customers.

As longtime expert in mechanical surface treatment solutions we know, what makes a good tool: High performance, efficiency and safety. Osborn professional tools are the result of this pursuit. One example unifying all these factors is the Osborn LONGLIFE brush with its special filament.

**Osborn Tools – First Choice in Quality.**

## Osborn LONGLIFE – Performance Champion.

Min. 5-times less wire  
breakage and wear

Material friendly and  
non-stock removing

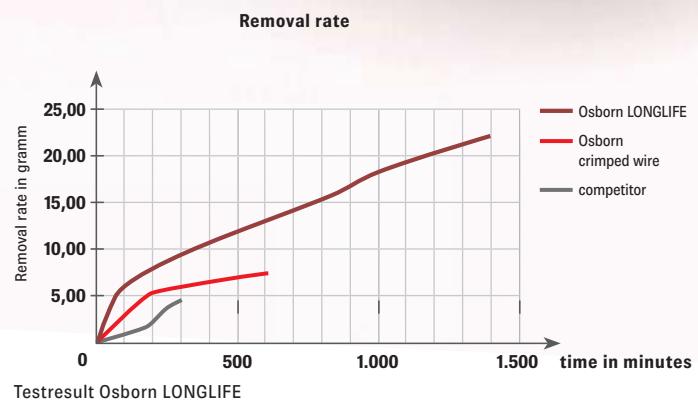

Available in  
Ø 60, 75, 80, 100 mm

### Best of both worlds.

Extremely long lasting cup brush with  
LONGLIFE-filaments for a fine, satinised  
surface finish. Ideal for descaling and  
cleaning of larger surfaces.

**High performance of a knotted brush  
yet as material friendly as a crimped  
wire brush.**

### LONGLIFE in detail:

# QUALITY & PERFORMANCE TESTS: TEST-ROBOT

Test robot in our R&D lab in Burgwald

## Accurate testing without compromise.

At Osborn, we use a state-of-the-art industrial robot to determine the performance of our products. The robot delivers accurate results and makes it possible to carry out a wide range of quality assurance checks, all under the same conditions.

As well as providing pure performance data, the robot helps us through continuous monitoring to guarantee a consistent quality standard. Complex processes are easily replicated using realistic simulations to optimise the tool.

## Our Qualitylines

All our products are manufactured with greatest care in order to meet your demands and requirements in the best way.

For your orientation, we have especially categorized the machinebrushes for angle grinder, power drill and high-speed as well as the handbrushes into three productlines: From solid DIY-quality to high-end products for demanding industrial applications. Just look out for the productline being mentioned directly next to the product image.

### PERFECT

Products in solid DIY-quality.

### SPECIAL

High-performance products in industrial quality.

Nearly the whole range is TÜV-Süd certified.

### EVOLUTION

High-end products with highest quality materials for demanding industrial applications and long service-life.

### Wheel Brushes

knotted wire

**SPECIAL**

# FASTER TO THE RIGHT PRODUCT

## The best advice. On the packaging.

Osborn packaging makes it easy to find the right product.

In just **four quick steps** you can find the perfect tool from our wide range of brushes and other products. Clearly displayed on our POS materials are the four, selfexplanatory steps you need to obtain expert advice.

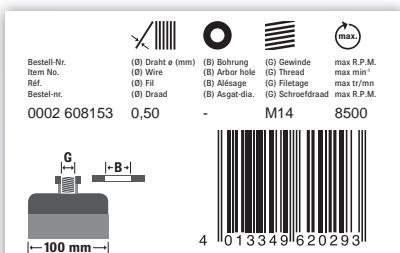

### 1. Easy selection:

Icons on the packaging tell you which machine to be used.  
Angle grinders, power drills, or high-speed drill – this question is quickly answered.

### 3. Detailed info on the product:

The details about the product provide information on wire, bore/thread, rounds per minute, etc.

### 2. Quick info on trim materials:

Here, colours and text provide users with key information on the trim material. The colours also appear in the catalogue to help with material selection.

### 4. TÜV-Safety

TÜV-Süd seal on the package means: This article is certified.

# SCAN INFORM DECIDE

## Inform online – decide at the shelf.

Osborn links the shelf to the Internet. Customers have the option of loading additional details and product information directly onto their Smartphone, using the QR codes on our packaging. It is so easy to clear up questions about our products right there at the shelf.

The QR codes are located on our individual packaging, on loose products in boxes and on the display card.

**Code on the packaging and the web at the POS.**

**1. QR-Code on shaft-tags.**

**2. QR-Code on packaging.**

**3. QR-Code on display cards.**

## YOUR OSBORN- ADVANTAGE

### Efficient advice

The QR-code can be a great source of advice as it allows the salesperson to access videos, pictures and information on the selected product quickly at the POS.

# INTELLIGENTLY PACKAGED & PRESENTED

Osborn products come in different kinds of packaging, with each version explaining and promoting the product to the full.

## 1. Box / individual packaging

## 2. Display card

Users can immediately see which machine is to be used with the brush.

## 3. Shaft-tag in assortment box

Shaft-tags provide basic information like EAN code. The header board of the box can be used front and backside (for wood or metal brushes). The box can be used length or crossways.

## 4. Flexibility

Presenting the products professionally:  
With the help of our packaging, you can compile your individual sales walls.

Contact us for more details.

(Pictures show a sample configuration)

## Brushes

### Introduction & technical information

# PRODUCT INTRODUCTION BRUSHES

#### Osborn brushes – first-class, brand-name tools for every application.

There are any number of tasks and applications for a brush. But it is not just the job that determines which brush to use. The tool used and the surface to be finished are equally important. To ensure you always have the best brush in each case, you should entrust your surfaces to a brand-name brush. This is the only way to guarantee that everything from trim material to brush shape is correct.

#### Overview of the most common machine brushes:

## THE OSBORN- ADVANTAGE

Osborn has the right brush for every application.

As a professional partner to trade and industry, Osborn sells high-performance tools suitable for all applications throughout the world. You can rely on Osborn's many years of experience and skill.

# Brushes

## Introduction & technical information

### Trim materials: the right material for every application

For our products, we only use trim materials that we have developed ourselves or which have been specifically selected. Constant laboratory tests ensure high material quality. Your Osborn tool is always perfectly suited to a certain type of brushing work. Our technical sales department will be pleased to advise you on the ideal trim material for your given application.

#### Steel wire, crimped

- Most common trim materials
- For flexible brushing tools
- Suitable for light surface treatment and deburring operations

#### Brass-coated steel wire, cordwire

- Cordwire with high tensile strength
- For demanding brushing and deburring operations, as well as for structuring wood

#### Steel wire, cordwire (Longlife)

- Cordwire with high tensile strength
- Extremely long-lasting
- Combined advantages of crimped and knotted wire
- For light derusting operations

#### Tampico fibre

- Pure plant fibre
- For wet and dry cleaning operations
- Heat-resistant
- In combination with compound also suitable for polishing

#### Steel wire, straight or knotted

- For extreme brushing requirements
- For brushing tools with less flexibility
- Ideal for cleaning weld seams and removing heavy deposits of scale or corrosion

#### Horse hair

- Animal hair
- For light cleaning operations
- Suitable for sealing

#### Osborn special steel wire, crimped or knotted

- Heavy duty steel wire with high tensile strength
- High elongation and long brush life
- For extreme brushing demands

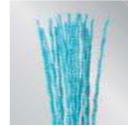

#### Synthetic filaments

- Highly flexible
- Resistant to weak acids and alkaline solutions
- Wear resistant

#### Stainless steel wire, crimped, straight or knotted

- Most commonly used alloys: 1.4310 and 1.4401 (1.4571 available on request)
- For use where residue from normal steel wire would contaminate surfaces.

#### Abrasive filament, aluminium oxide

- Nylon filaments impregnated with abrasive grit
- Light deburring of steel and non-ferrous metals

#### Brass wire

- Surface finishing on non-ferrous materials (copper and brass)

#### Abrasive filament, silicon carbide

- Nylon filaments impregnated with silicon carbide
- Uniform performance as new abrasive particles come to the surface
- High elasticity with no danger of breakage
- Long brush life
- For deburring/descaling, roughening and grinding

#### Brass-coated steel wire, mono wire

- Single wires
- High tensile strength
- For demanding brushing and deburring operations

#### Novofil

- High-performance, high-tech material
- Flat or round filaments
- Broad range of materials, different degrees of hardness
- For deburring and internal finishing

#### Novoflex-B

- Abrasive spheres on a flexible structure
- Self-centring
- Creation of surfaces with a high contact ratio (plateau finish)

Please also note our different qualitylines for products.  
You will find the definition in our chapter BRUSHES directly with the product image.

**PERFET** Products in solid DIY-quality.

**SPECILALE** High-performance products in industrial quality.

Nearly the whole range is TÜV-Süd certified.

**EVOLUTION** High-end products with highest quality materials for demanding industrial applications and long service-life.

### Brush trim and material suitability

The trim material determines the suitability of the selected brush for the surface to be finished.

A quick overview of the suitability of your brush can be found in the trim and material charts in the info headings on the product pages.

#### TRIM AND MATERIAL

Simple equation: the right trim for the material being finished.

Product available with:

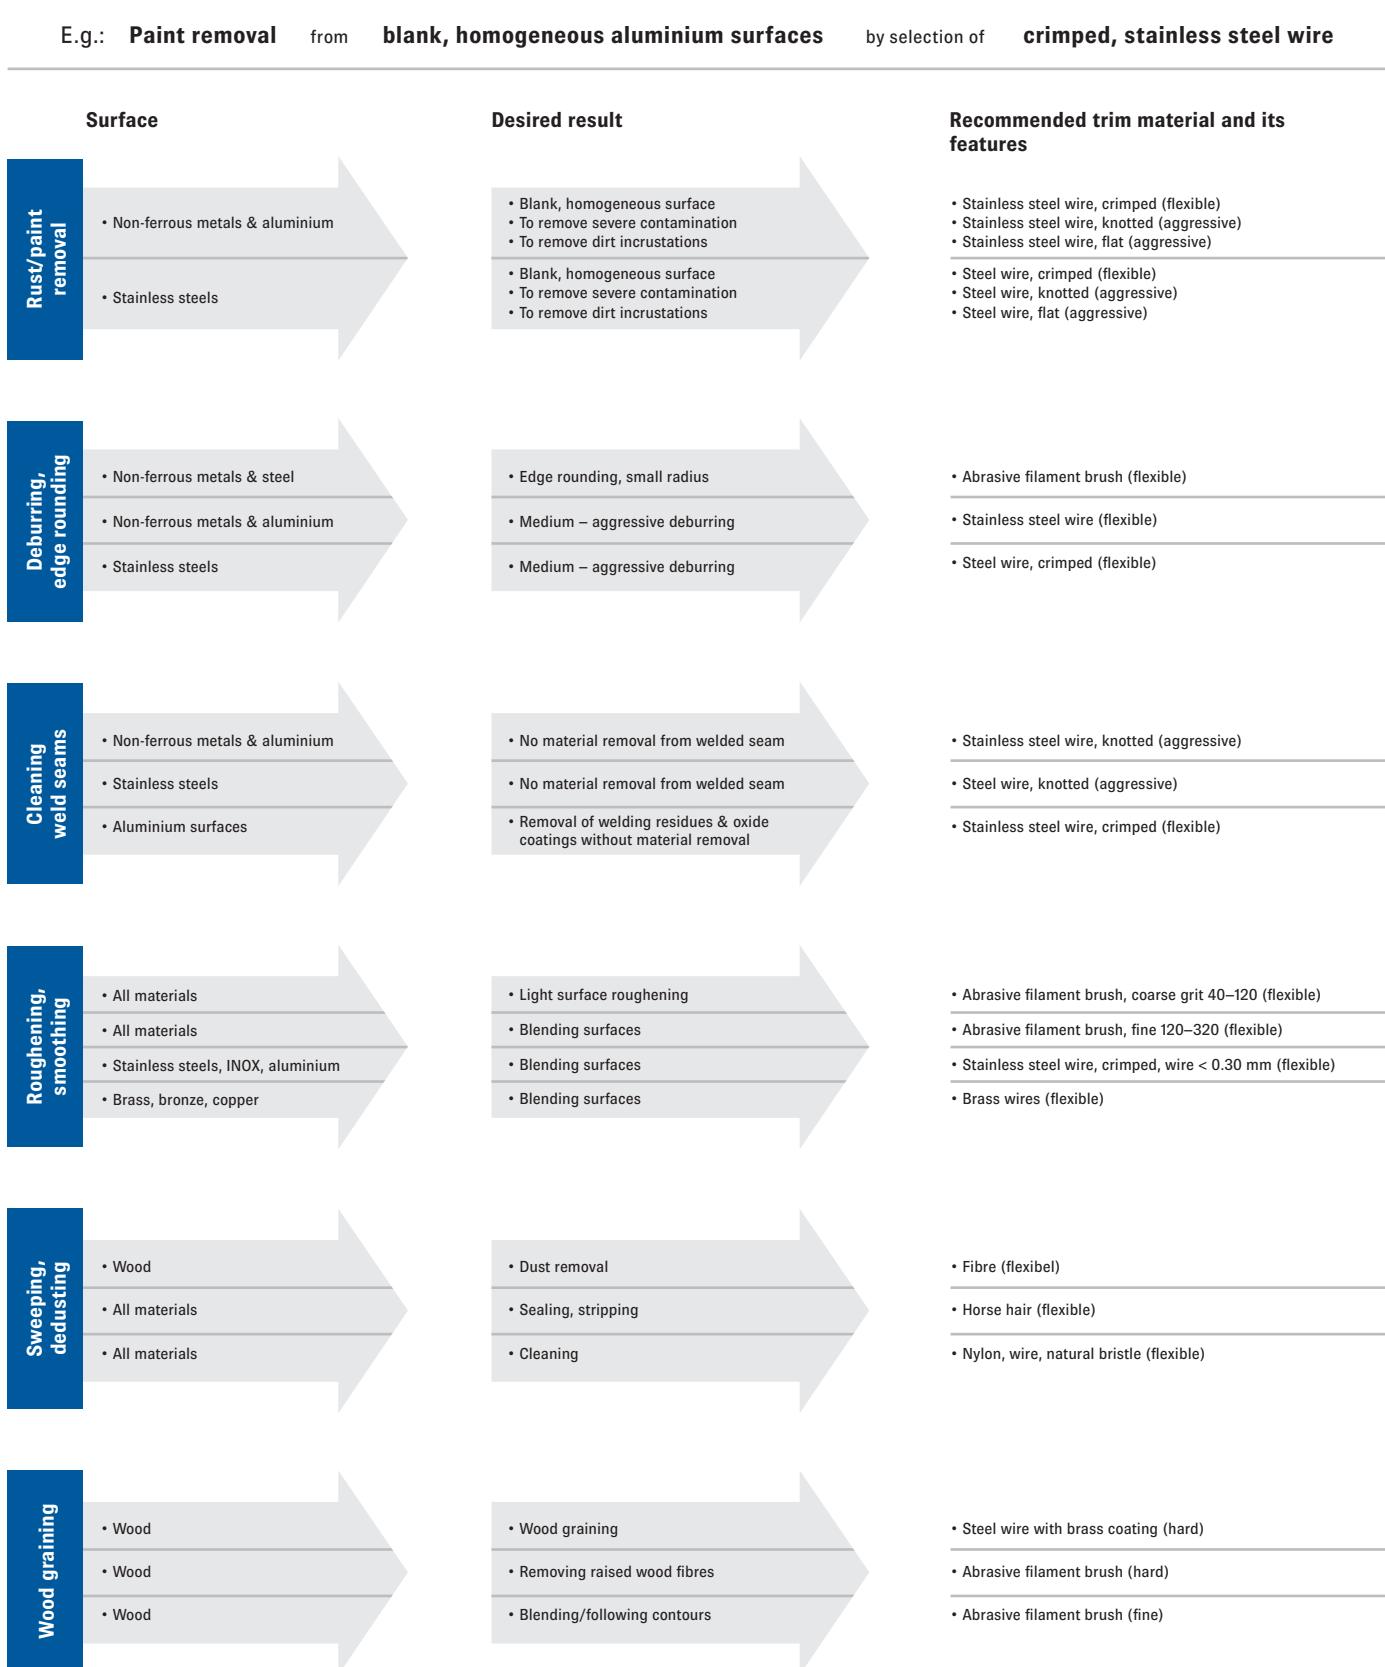

|                       | Steel | Cast iron | Stainless steel | Non-ferrous metal | Aluminum | Softwood | Hardwood |
|-----------------------|-------|-----------|-----------------|-------------------|----------|----------|----------|
| steel wire, crimped   | ■     | ■         |                 |                   |          |          |          |
| steel wire, stainless |       |           | ■               | ■                 | ■        |          |          |
| brass wire            | ■     |           |                 | ■                 |          | ■        | ■        |

# Brushes

## Introduction & technical information

### Easy identification of the best trim material.

The correct choice of trim material is very important in obtaining the best surface finish, because the desired result will only be achieved by correctly matching the trim to the surface material being finished. The illustration below clearly explains the relationships involved in each stage of the process.

# TECHNICAL INFORMATION

## Safe and operating speeds

The workplace safety regulations require the maximum safe speed to be observed. Details can be found in the product overview in this catalogue, on the packaging and on the brush itself (see fig.).

**The definition of operating speed is based on the peripheral speed and brush diameter.**

The ideal operating speed is generally significantly lower than the safe speed.

## Operating and clamping width of the brush

The **operating width** describes the contact surface between brush and workpiece.

Press the trim together slightly to measure the operating width.

The **clamping width** is measured between the washers (see fig. left).

Contact us for more information on the clamping width.

## Brush diameter and trim length

The relationship between the diameter of the brush (brush body) and the length of the trim determines how the brush operates. Generally speaking:

**Soft, flexible brushes,**  
e.g. for finishing structured workpieces or  
surface cleaning.

**More aggressive brushing,**  
e.g. for deburring or removing  
impurities.

## Ideal position of brush in relation to workpiece

The contract pressure of a brush is defined by factors such as its insertion depth in the workpiece. Our recommendation is 3 times the filament diameter, e.g. 1.0 mm insertion depth for a wire thickness of 0.35 mm.

The ideal position also ensures less wear.

Our application engineers will be glad to advise.

## Brush trim density

The trim density is determined by the number of wire tips per surface unit.

High trim densities are best for cutting performance and service life (e.g. deburring).

Lower trim densities increase brush flexibility and are required for finishing intricately shaped surfaces.

**ANY QUESTIONS? We will be glad to help: [service@osborn.de](mailto:service@osborn.de)**

# Brushes

## Introduction & technical information

### Important safety instructions

For **efficient and safe use**, always choose the maximum possible brush diameter that can be fitted to the grinder.

As mentioned in the section on operating speeds, the brush diameter defines the **peripheral speed**. It can also affect brush performance.

The table below provides a summary.

#### Installation instructions

Please read before fitting the brush.

- The speed of the drive shaft on your machine should not exceed the maximum safe speed of the brush.
- The length of the shaft should be sufficient to ensure a firm fit in the chuck.
- Brushes with a clamping shank can be installed without problems in standard drill chucks or collets.
- The connecting threads on the brushes have flats for simple installation and removal.

| rpm <sup>-1</sup> | Brush diameter in mm |       |       |        |       |       |       |       |       |       |       |       |
|-------------------|----------------------|-------|-------|--------|-------|-------|-------|-------|-------|-------|-------|-------|
|                   | 20                   | 40    | 50    | 80     | 100   | 125   | 150   | 180   | 200   | 250   | 300   | 350   |

| 25.000            | 26,17                | 52,33 | 65,42 | 104,66 |       |       |       |       |       |       |       |       |

#### Safe peripheral speeds:

Guide values for safe peripheral speeds are, for example, 30-35 m/sec. for brushes with crimped wire, and 18-22 m/sec. for brushes with abrasive filaments and synthetic compound trim materials.

Brushes with knotted wire should be used in angle grinders at max. 85 m/sec., and stationary machines at max. 45 m/sec.

#### Important:

Hand tools should only be fitted with brushes up to a max. OD of 180 mm.

#### General safety instructions

- Wear protective clothing to protect yourself from injury.
- More safety instructions and examples of usage can also be found on the Internet.

## Angle grinder

## Important user information

### Brushes for angle grinders

To be noted when selecting brushes and using angle grinders:

#### 1. Typical brush types for angle grinders

**Wheel brushes**

Available with knotted and crimped wire as well as abrasive filaments.

**Cup brushes**

Available with knotted and crimped wire, as well as abrasive filaments.

#### Please note:

When deciding on a suitable diameter for a cup brush, do not forget that it will spread out during operation. The key factor in determining the maximum possible brush diameter is therefore the size of the safety guard.

**Bevel brushes**

Available with knotted and crimped wire.

#### 2. Determining the operating speed

The maximum operating speed of a brush depends on its diameter. As in the case of a bicycle wheel, the larger it is the fewer turns are needed to cover a particular distance.

The most common speeds are colour-coded to clearly show the differences and for ease of identification:

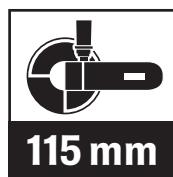

| Diameter:        | Ø 115 mm<br>(4 1/2") | Ø 125 mm<br>(5") | Ø 150 mm<br>(6") | Ø 180 mm<br>(7") | Ø 230 mm<br>(9") |
|------------------|----------------------|------------------|------------------|------------------|------------------|
| Operating speed: | 12.500 rpm           | 11.000 rpm       | 8.500 rpm        | 8.500 rpm        | 6.500 rpm        |

#### 3. Which brush for which angle grinder?

| Brush type & trim    | Ø Brush |     |     |     |    |           |     |     |     |     |     |     |
|----------------------|---------|-----|-----|-----|----|-----------|-----|-----|-----|-----|-----|-----|

#### The machine information on the packaging

The machine icon on all Osborn packaging will also show the maximum permitted machine size.

# PRODUCT FINDER

## WELD SEAM CLEANING

Impurities or non-metallic inclusions can occur on the surface of the weld, depending on the welding procedure. Non-metallic inclusions do not adhere to the surface to the extent of the other materials in the weld. If a coating is later applied to the welded part, faults in the coating and corrosion can occur in the area of the inclusions.

The QR code will take you directly to the special page for welding with an easy to use online product finder.

Osborn can provide the appropriate cleaning tool for any welding procedure and type of seam to be finished (root, filler or cover). Brushes are the ideal solution because they do not grind the material, unlike commonly used grinding wheels.

Our weld matrix will help you select the right product for your application.

### The most common contamination occurring during welding (in order of technique):

#### Slag

Residues that occur as the electrodes wear.

#### MMA

#### TIG/MIG/MAG

#### PLASMA

#### Spatter

Grinding wheels remove this residue.

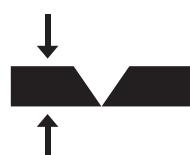

#### Silicates

Silicates occur when silicon – present in most steel alloys – burns during the welding process and change to SiO<sub>2</sub>.

#### Blue Colour

Oxide deposits that form mainly when welding stainless steel.

# Brushes

## Angle grinder

## Important information

### Material care

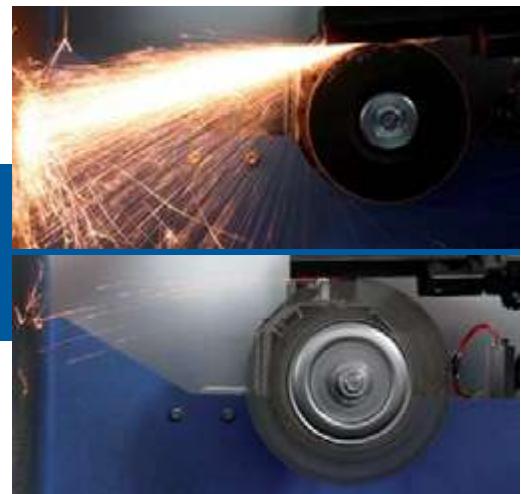

Wire brushes are not cutting tools. They remove residues such as slag, silicates and bluing but leave the original surface structure untouched.

That saves time and money!

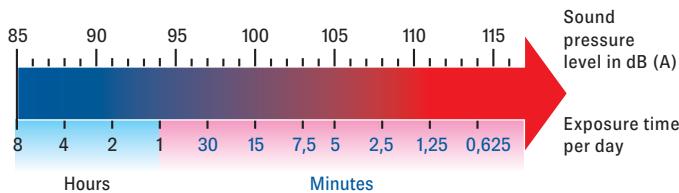

### Flying sparks

Flying sparks are a safety risk in confined spaces such as pipeline installation sites, especially if several people are working together.

Brushes generate 95 % less sparks than grinding wheels.

### Noise level

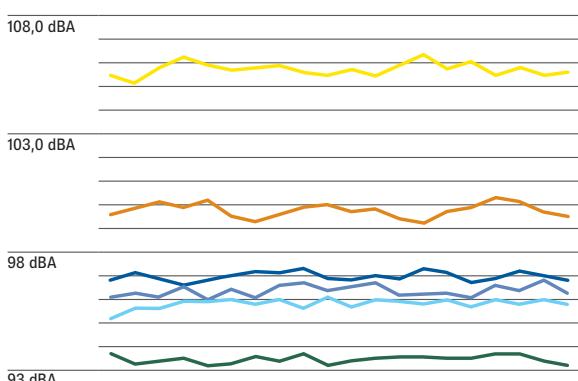

Sound pressure level and daily exposure times for maintaining a daily noise exposure level (Lex), 8 h of 85 dB(A) - upper value

### Noise

Studies have shown that the noise level in the metal-working industry is one of the highest compared with other sectors. EU directives specify an average noise level of 85 dB (A) per day. Noise is one of the best known causes of illness.

### Noise comparison

- Cup brush, 60 mm, M14 steel wire, crimped 0.30
- Disc centre 115 x 12 knotted steel wire 0.50
- Disc centre 115 x 6 knotted steel wire 0.50
- Grinding wheels 125 x 6 x 22,23
- Abrasive mop wheel 125 x 22,23 K 80
- Metabo WE14-125 grinder without tool

This diagram shows that wire brushes are an average 6–8 dB (A) quieter than grinding tools. This is a significant reduction and a contribution to occupational safety because a variation of just +/- 3 dB (A) is the equivalent of doubling/halving the noise level.

## Brushes Angle grinder

# CORDLESS IS KING

More power, longer battery life and no cables: the new generation of cordless power tools, make work easy, even if there is no electricity socket available. Battery life and the actual performance of these tools, has made a huge leap in recent years. Cordless power tools are now an alternative for a whole range of users. Whether on construction sites, or for plumbing, HVAC, janitor services, firefighting, road service and other mobile units, cordless power tools are now considered an essential piece of equipment.

### Why special tools?

Cordless power tools are commonly used by mobile services, where not the full range of accessories is available. Users therefore need universal tools which can tackle a variety of tasks on different materials. By this the amount of accessories to be carried along on a construction site can be reduced when steel, stainless steel and wood need to be worked on.

Commonly cordless angle grinders run with a 30% reduced working speed compared to usual angle grinders. Having specifically developed accessories for cordless power tools in use means that the perfect result of brushes, grinding- or cutting discs can be reached by a speed of 7,000 to 8,000 rpm. Osborn Brushes are reduced in weight and therefore prolong the battery life between recharges by 20–25%.

### Advantages

- Low weight
- Precise Working
- Multifunctional
- Easy to handle
- Reduced imbalance and vibration
- Longer battery life (20–25 %)
- Fewer charging cycles
- Universal usage on all materials
- Can be used for different materials

# WE MAKE IT EASY FOR YOU!

OSBORN has developed accessories which are flexible in use, light weight, easy to handle and assure highest precision.

The end result will meet all your expectations and fulfill all aspects of work safety. This is the only way to work effectively and get the best out of your cordless power tool.

## Power drill

### Important user information

#### Brushes for power drills

To be noted when selecting brushes and using power drills:

#### 1. General user information

The brushes on the following pages are suitable for all brands of power drills. It does not matter whether you are using a 1- or 2-speed machine or a percussion drill.

The recommended speed is approx. 1,500 - 3,500 rpm.

#### 2. Typical brush types for power drills

##### Wheel brushes

Available with knotted and crimped wire, as well as abrasive filaments or plastic bonded wires.

##### Cup brushes

Available with knotted and crimped wire, as well as abrasive filaments and plastic bonded wires.

##### Please note:

Cup and end brushes spread during operation.

##### End brushes

Available with crimped wire, abrasive filaments and plastic bonded wires.

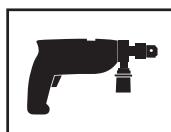

##### Flap wheel brushes

Available with crimped wire, abrasive filaments or Tampico fibre.

##### Tube & internal brushes

All details can be found in the chapter on internal finishing.

#### The machine information on the packaging and displays

Details on machine suitability can also be found on the machine icons on Osborn packaging and counter and shelf displays.

Do-it-yourself type for power drills.

## Cup Brushes

Do-it-yourself type for power drills in self-service packaging.

# Brushes

## Power drill

**BRUSHES**

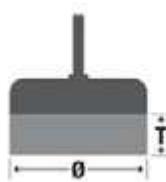

### Cup Brushes

**crimped wire plastic-bonded**

#### EVOLUTION

Brush with plastic-bonded wire for longer service life and reduced wire breakage.

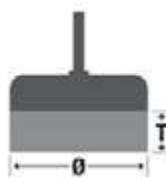

### Cup Brushes

**abrasive filament**

#### PERFECT

The trim on these brushes follows the contours of the work piece without significantly affecting the surface. Brushes with abrasive bristles for cleaning materials.

#### USAGE

|                           |                                     |      |

## High-speed

## Important user information

### Brushes for high-speed machines

To be noted when selecting brushes and using high-speed machines:

#### 1. General user information

Thanks to their reinforced components and especially rigid clamping characteristics, the brushes on the following pages are suitable for high-speed drive units (e.g. straight grinders, pneumatic tools) and for all common brands.

#### 2. Typical brushes for high-speed machines

Wheel brushes

Available with knotted and crimped wire.

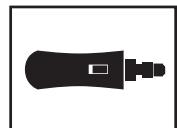

End brushes

Available with knotted, abrasive and crimped wire, as well as extra-long shaft and special shapes.

Please note:

End brushes spread during operation.

#### The machine information on the packaging and displays

Details on machine suitability can also be found on the machine icons on Osborn packaging and counter and shelf displays.

# Brushes

## High-speed

### Wheel Brushes

**knotted wire**

**SPECIAL**

For heavy-duty cleaning and deburring applications such as slag and silicate removal, weld seam finishing or removal of the underfloor protection in motor vehicles.

## Satin finishing drums – general information

### Important user information

#### Satin finishing drums for satinisers

#### To be noted when selecting grinding tools and using satinisers:

Satinising is a one-stage system for creating flat surfaces. The main considerations when selecting the satinising tools is the question of how the original surface should look like after your finishing process.

There are three possible finishing grades when satinising a surface:

**Coarse**

**Medium**

**Fine**

### 1. General user information

These products can be fitted simply and easily thanks to their 19/6 bore (with 4 keyways) which suits all common satinisers.

### 2. Typical product for satinisers

#### Abrasice cloth rollers

Abrasice cloth rollers offer the advantages of a flexible abrasice cloth.

Thanks to their open and flexible structure, they conform perfectly to the workpiece being ground.

They are suitable for coarse, medium, fine and superfine grinding.

For pregrinding we recommend our satin finishing drums with grit 60/80 und 120.

### 3. Advantage of the cylinder shape

Peripheral grinding in comparision to face grinding makes for a very nice grinding surface pattern. The working width of 100 mm is in additional absolutely ideal to work larger surfaces.

## Satin finishing drums

### Satin Finishing Drum abrasive

Satin Finishing Drum with bore 19 and 4 keyways.  
To be used for pre-grinding and structuring.  
Can also be used for deburring.

# Hand brushes

## Important user information

### Brushes for manual use / hand brushes

To be noted when selecting brushes and using manual hand brushes:

#### 1. General user information

Our hand brushes are suitable for all manual work such as deburring, cleaning, rust or paint removal. We also have brushes for various kinds of painting and decorating.

#### 2. Typical brush types for manual use

**Hand brushes**

Available with wood or plastic body and handle.

**Brooms**

Available with wire or nylon trim, plus floor and scrubbing brushes.

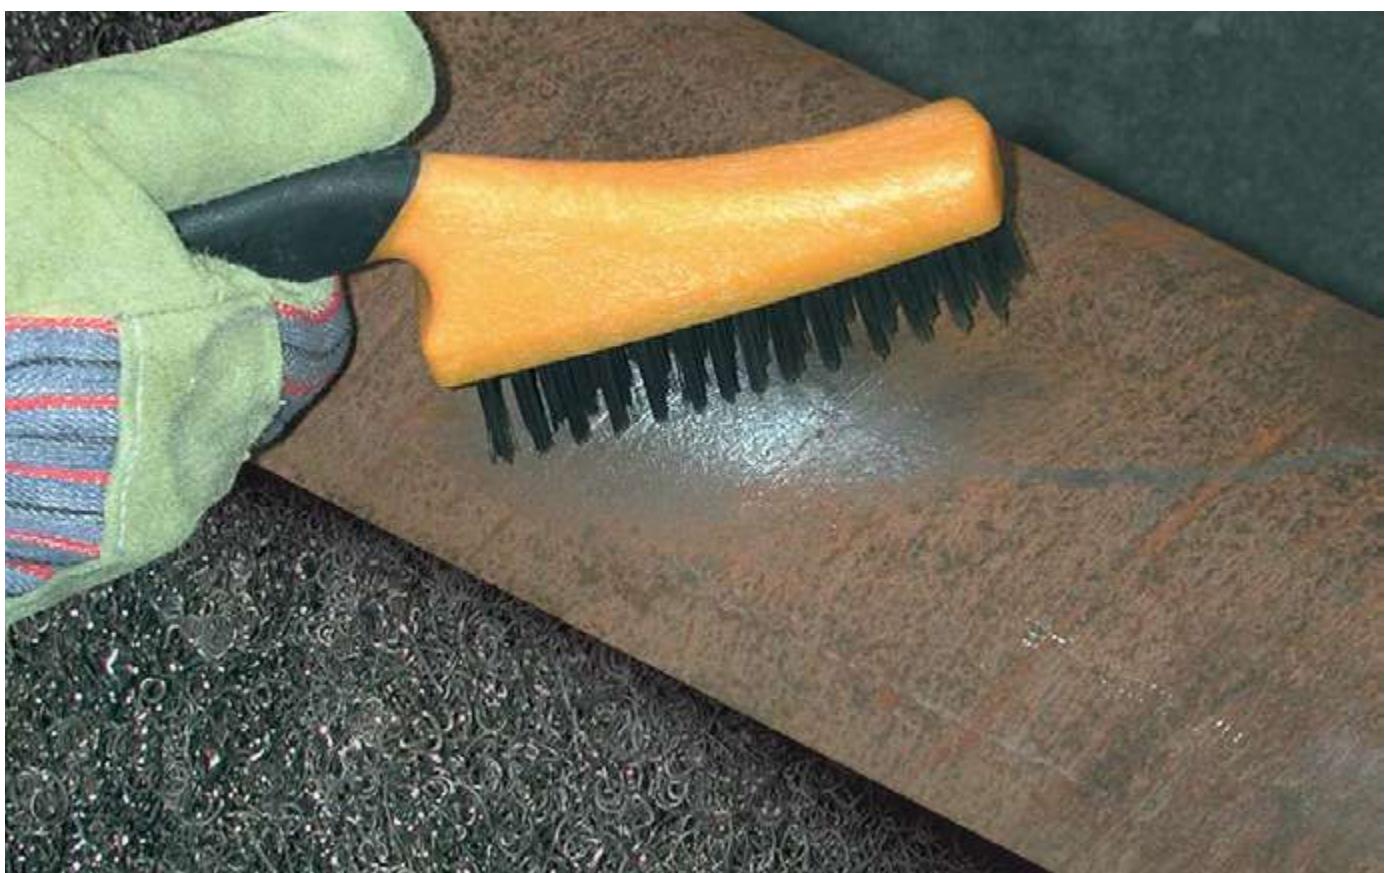

**Bristles**

Available with flat, round and special bristles.

**Accessories**

We also have a selection of useful accessories.

## Polishing/Satinising

### Introduction & technical information

# PRODUCT INTRODUCTION POLISHING/SATINISING

#### Fine surface finishing for every application

Professional surface finishing encompasses a complex and broad spectrum of different mechanical finishing processes in which polishing and satinising play a key role.

As a specialist in surface fine machining, Osborn offers a large selection of high-performance tools for all applications associated with polishing and satinising. We have organised our polishing and satinising products in such a way to suit the type of machine used.

#### The three key techniques for achieving the perfect surface finish:

There are 3 techniques for producing the desired surface finish.

#### 1. Polishing (power tools)

Polishing is intended to **create perfect high-gloss surfaces** and can be performed using a variety of power tools.

Generally, 3 steps are needed:

- Cutting
- Polishing
- Colouring

We recommend a combination of different quality polishing cloths and polishing compounds. Please note that polishing compound is a must for polishing.

#### 2. Polishes & compounds

Our compounds supplement our range of surface-polishing tools.

The **polishing compounds** can be used for manual or machine polishing and cover the entire range of surface finishing, from grinding and brushing to cutting and colouring.

Steel, stainless steel, non-ferrous metals, wood, paint and many other surfaces can be finished when combined with the appropriate polishing tool.

#### 3. Satinising (power tools)

The starting point is a high-gloss surface. Through satinising, the high-gloss surface will receive a matt look. The finishing result may vary (coarse, medium, fine).

A satinised finish can be created using wet and dry techniques.

Satinising is usually a one-stage process.

No polishing compound is needed for satinising because the abrasive particles are already embedded in the base material of the satinising tool.

# CUTTING SPEED

**Cutting speed depending on rounds per minute and diameter**

Cutting speed

|       |  | $\varnothing$ mm |     |     |     |     |     |     |     |     |       |
|-------|--|------------------|-----|-----|-----|-----|-----|-----|-----|-----|-------|
|       |  | 100              | 150 | 200 | 250 | 300 | 350 | 400 | 450 | 500 |       |
| U/min |  | 300              |     |     |     |     |     |     |     |     | m/sec |
| 300   |  |                  |     |     |     |     |     |     |     |     | m/sec |
| 300   |  |                  |     |     |     |     |     |     |     |     | m/sec |
| 400   |  |                  |     |     |     |     |     |     |     |     | m/sec |
| 500   |  |                  |     |     |     |     |     |     |     |     | m/sec |
| 600   |  |                  |     |     |     |     | 11  | 12  | 14  | 15  | m/sec |
| 800   |  |                  |     |     | 10  | 12  | 14  | 16  | 18  | 20  | m/sec |
| 1400  |  |                  | 14  | 18  | 22  | 25  | 29  | 33  | 36  |     | m/sec |
| 1600  |  | 12               | 16  | 20  | 25  | 29  | 33  | 37  | 41  |     | m/sec |
| 1800  |  | 14               | 18  | 23  | 28  | 33  | 37  | 42  | 47  |     | m/sec |
| 2000  |  | 10               | 15  | 21  | 26  | 31  | 36  | 41  | 47  | 52  | m/sec |
| 2200  |  | 12               | 17  | 23  | 28  | 34  | 40  | 46  | 51  | 57  | m/sec |
| 2400  |  | 13               | 19  | 25  | 31  | 37  | 44  | 50  | 56  |     | m/sec |
| 2600  |  | 14               | 20  | 27  | 34  | 40  | 47  | 53  |     |     | m/sec |
| 2800  |  | 15               | 22  | 29  | 36  | 43  | 51  | 58  |     |     | m/sec |
| 3000  |  | 16               | 23  | 31  | 39  | 47  | 55  | 63  |     |     | m/sec |

POLISHING /  
SATINISING

**Economic cutting speeds (average values):**

| Usage                                | Cutting speed              |
|--------------------------------------|----------------------------|
| Grinding                             | ca. 30 m/sec               |
| Satinising                           | ca. 20 m/sec               |
| Cutting                              | ca. 25–30 m/sec            |
| Polishing of metal                   | ca. 30–36 m/sec $\pm 15\%$ |
| Polishing of metal (strong contours) | ca. 20 m/sec $\pm 10\%$    |
| Polishing of plastic                 | ca. 15 m/sec $\pm 10\%$    |

The higher the number of revolutions per minute (RPM), the harder and less flexible the trim.

## Polishing/Satinising

### Introduction polishing

# PERFECT POLISHING

Watch the video on YouTube:  
[www.youtube.com/osbornsolutions](http://www.youtube.com/osbornsolutions)

YouTube

### Maximum 3 steps for perfect high-gloss surfaces:

1. Cutting follows surface grinding and removes material. For this reason, cutting is not suitable for soft metals. Working with a sisal cloth ring smoothes out unevenness, removes striae and scratches, and prepares rough and uncoated surfaces for polishing.

2. High-quality polishing removes traces of cutting and further smoothes the surface. The best results can be achieved using our specially developed NOTIFLEX® polishing cloth (outstanding results without unattractive bias stitching where reduced amounts of compound are used). Numerous high quality non-fraying cloth polishing buffs with extended service life are available.

3. Colouring calls for minimal pressure and short finishing times. Again various polishing buffs are available.

### Which combination for which result?

The following summary will help you find the best combination of polishing compound and polishing tools needed for each step in finishing each material.

► The short version can be found in the info area for each product.

#### Key to the materials below

|     |                    |      |                |
|-----|--------------------|------|----------------|
| 1 = | Sisal cloth        | 6 =  | Compound, blue |
| 2 = | Notiflex (NTF) 914 | 7 =  | Felt 2-stage   |
| 3 = | Notiflex (NTF) 925 | 8 =  | Cloth 101      |
| 4 = | Compound, white    | 9 =  | Cloth 290      |
| 5 = | Compound, brown    | 10 = | Felt 3-stage   |

| 3 STEPS             | <b>Polishing as a 3-step process</b>  |  |                       |                                 |                           |                                  |
|---------------------|---|--|-----------------------|---------------------------------|---------------------------|----------------------------------|
|                     | System using top-quality, patented Notiflex mat without bias stitching.<br>Suitable for all machines, diameters and bores.      |  |                       |                                 |                           |                                  |

# Polishing/Satinising

## Polishing tools for stationary machines

### Wave Buffs

#### sisal and cloth

Wave Buffs are corrugated waves of cotton cloth or sisal-cloth fixed around a metal clinch ring. This uniform construction ensures a long service life, high polishing action and a cool air effect.

Applications: in combination with Osborn compounds, flat parts, pots & pans can be polished and finished, this product is also suitable for removing dust after sanding wood. The construction prevents the working surface from becoming too hot, ideal conditions for a perfect finish. Wave buffs are the chosen product when machine oscillation is not available.

### Airflow Buffs

#### cloth

These general purpose buffs are manufactured with irregular folds clasped in a metal clinch ring. This is our standard, most cost effective buff for nearly all polishing and finishing applications. Buffs can be mounted together on a shaft to achieve any required width. Some trim materials can be treated for a stiffer buff and extended service life.

# Polishing/Satinising

## Polishing tools for stationary machines

Cloth is folded with regular pleats, arranged and fixed around a cardboard core. Pleated Buffs are used for polishing and finishing particularly complex parts. These buffs combine a cool air effect with great resilience. To process a wider part, several buffs can be ganged together. The uniform folds guarantee excellent results, with high compound retention and a long service life. Different trim quality is available depending on whether the process is polishing or colouring.

Open structured biased sisal web is clasped in a metal clinch ring. Close stitching results in a very hard buff creating minimum dust when in operation. Sisal airflow buffs are the most cost effective solution for all cutting operations whether processing: pan lids, stainless steel, aluminum or non-ferrous metal surfaces, builder's hardware, car parts or household appliances.

Airflows, pleated buffs and wave buffs are most economically manufactured on a metal clinch ring. The inside diameter of the clinch ring may fit precisely on the machine shaft, more commonly the inside diameter can be reduced to the correct bore size with reusable metal centre-plates.

# Polishing/Satinising Polishes and compounds

## The right compound for your finishing step

Polishing compounds are essential for all polishing jobs because they contain the necessary ingredients to achieve a particular surface finish.

It is also important to select the correct polishing compound for the desired surface finish.

### Important note:

No polishing compound is needed for satinising because the abrasive particles are already embedded in the base material of the satinising tool.

## The right polish for your lacquer

Polishes ensure a professional result for lacquer finishes. They are designed for the professional finishing of all lacquer types.

Our polishes come in different varieties, depending on the finishing step.

Details are given on the following pages.

Items available immediately from stock are printed in bold type.  
Please contact us for other sizes/materials: [service@esborn.de](mailto:service@esborn.de)

# Polishing/Satinising Polishes and compounds

## Important user information

### Polishes and compounds – the key to a perfect polishing result

#### What to look for when selecting the right polish:

#### 1. General user information

Our polishes are intended for the professional finishing of all lacquer types. Different compounds are available for different finishing steps. Details are given in the figures below.

#### 2. Polish types and applications

| Strong Cut    | High-efficiency abrasive compound for scratches and damage that can still be repaired. For the second step, we recommend Nano-Polish.                         |
|---------------|---|
| Cut           | Fine abrasive compound for all wear/weathering marks in older paints. For a deep gloss, we recommend using Nano-Polish in the second step.                    |
| Complete      | Fine abrasive compound to remove all wear/weathering marks in all kinds of paint. For dark paint, we recommend using Finish in the second step.               |
| Complete Plus | Especially for small scratches and for reviving surfaces. For dark lacquer we recommend Finish as second step.  |
| Finish        | Ideal for the hologram-free removal of tiny scratches and films on conventional and fresh paints. Brings a deep and brilliant gloss to dark lacquer.          |
| Nano-Polish   | Especially suitable for the new generation of scratch-resistant lacquer. For removing tiny scratches, holograms and films to give a deep and brilliant gloss. |

## Polishing/Satinising Polishes and compounds

# OSBORN CLASSIC® COMPOUND RANGE

Osborn Classic® Compounds are top selling products taken from the former Unipol® and Langsol® ranges. The 14 compounds achieve excellent results whether brushing, polishing, colouring or superfinishing on aluminium, stainless steel, non-ferrous or plastic. They can be used together with all buffs in the Osborn range in a one-step or multi-step process.

1 piece = approx. 1.000–1.200 g

# PERFECT SATINISING

Hier youtube-Video ansehen.  
[www.youtube.com/osbornsolutions](http://www.youtube.com/osbornsolutions)

YouTube

Satinising is a one-stage system for creating flat surfaces. The main considerations when selecting the satinising buff are what the original high-gloss surface should look like after the satinising process.

There are three possible finish grades when satinising a surface.

**Coarse brush stroke**

**Medium brush stroke**

**Fine brush stroke**

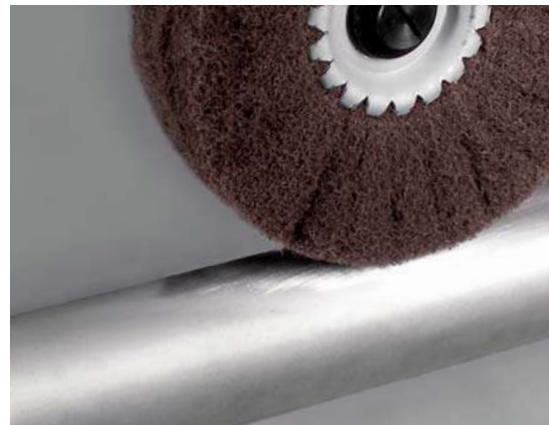

## Important note

**Non-woven abrasive tools are used without polishing compound because the abrasive particles are already embedded in the base material of the satiniser.**

These tools made of matted material containing abrasive particles are characterised by an open and flexible structure. They are self-sharpening and can be used in wet and dry applications.

Because they can also be used with hand-held tools, they are ideal for a wide range of applications, from satinising to deoxydising to superfine grinding.

**Our non-woven abrasive tools are available in different grades and sizes, depending on their purpose.**

## Finding the right tool

Please check your product choice using the information in the info heading. This will tell you the machine for each product and its suitability, as well as providing a summary of the available carrier material grades (grits) suitable for the material being finished.

| USAGE           | coarse      medium      fine      superfine |                                     |                                     |                                     |
|-----------------|---|-------------------------------------|-------------------------------------|-------------------------------------|
|                 | Satinising                                  | Desoxydising                        | Light grinding                      | Light deburring                     |

# Polishing/Satinising

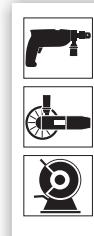

## Abrasives tools for different fittings

### Satinising Buffs

non-woven

Material is fixed in a toothed metal ring. The satiniser buff is clamped using conical spring washers.

### USAGE

|                 | coarse                              | medium                              | fine                                | superfine                |

For satinising, desoxydising, light grinding/deburring, blending and fine grinding. Surface will be have a fine, matt finish. Can be used in wet and dry processes. Don't use polishing compound.

Developed for usage on cordless power tools: Low weight, precise working without vibrations. Due to the weight reduction the battery life can be prolonged between 20–25%. You can work longer and reduce the charging cycles of your power tool.

More information on cordless powertool accessories see pages 36–38 and 95.

A variety of abrasive non-woven materials can also be used in the form of airflows, with layers of material gathered around a metal clinch ring. Best results are obtained at low RPM with minimum buff pressure, this also ensures long life.  
Applications: all satinising operations, on both manual and automatic machines.

The abrasive flaps are bonded radially to a phenolic tube. The three dimensional open web ensures a „self-cleaning action“ for easy removal of surface contamination or to obtain a decorative finish.  
Ideal for cleaning profiled or irregular parts, suitable to obtain an aesthetic finish.

The abrasive web is wound around a phenolic tube and treated, this ensures constant hardness and abrasiveness over the life of the product. Lipprox are perfect for light deburring.  
Suitable for light deburring and fast achievement technical surface finish. The product is clearly marked with a directional arrow and must rotate in the direction shown.

Items available immediately from stock are printed in bold type.

# Polishing/Satinising

## Abrasive tools for stationary machines

### SLK – Coated Abrasive Flap Wheels abrasive

Top quality coated abrasive flaps, in a selection of grades mounted around a core. Several defined sizes are available. Recommended for grinding formed parts in preparation for polishing.  
Applications: grinding steel tubes, grinding pots & pans or iron soles prior to polishing.

| mm  | Ø  |    | K40  | RRP        | K60 | RRP        | K80 | RRP        | K120 | RRP        |   |

Please note, satin finishing rollers can be found in the chapter machinebrushes on page 70/71.

### Centre-Plates

Airflows, pleated buffs and wave buffs are most economically manufactured on a metal clinch ring. The inside diameter of the clinch ring may fit precisely on the machine shaft, more commonly the inside diameter can be reduced to the correct bore size with reusable metal centre-plates.

# Brushtechnology Industrial Brushes

## Important user information Brushes for stationary machines

To be noted when selecting brushes and using stationary machines:

### 1. General user information

Brushes for stationary machines are suitable for bench deburrers, double grinders and special deburring machines.

### 2. Typical brushes for stationary machines

#### Wheel brushes

Available with knotted and crimped wire, as well as abrasive filaments.

#### End brushes

Available for brush heads for cut edge finishing.

### Standard bores for single-row brushes

We can change the standard bores according to your adapter.

Please see the below table to define the articles for standard bores for single-row brushes.

| Ø Brush |    | Ø Bore (mm)     |  | 13   | 15,9 | 16 | 19 | 20   | 22,2 | 25,4 | 30     | 31,75 | 32 | 35 | 38 | 40 | 44 | 50,8 |
|---------|----|-----------------|--|------|------|----|----|------|------|------|--------|-------|----|----|----|----|----|------|
| mm      | "  | Zoll / Inch (") |  | 5/8" | 3/4" |    |    | 7/8" | 1"   |      | 1 1/4" |       |    |    |    |    | 2" |      |

Brushes altered to bore 50,8/2" can be further reduced by 4M adapters with keyways.

### Standard bores for multiple-row brushes

Via pipe mounted multiple-row brushes are reduced through assembly of our on stock robust metal adapters.

Please see below table for available adapters according to pipe diameter.

Article numbers always start with 000200- and the respective individual article number of the adapter is to be added to it in your order.

| Ø Pipe |   | Ø Bore (mm)     |  | 9,53 | 10   | 12,7 | 13   | 16   | 19   | 20   | 22,2 | 25,4 | 30   | 31,8   | 32   | 35   | 40   | 50,8 |

# Brushtechology Industrial Brushes

## Wheel brushes

### crimped Osborn wire

Narrow version for easy self-installation to achieve larger working widths, combining several brushes on one shaft. Specially hardened wire for industrial applications.

### USAGE

|                           |           |
|---------------------------|-----------|
| roughening                | 0,15      |
| planing                   | 0,20      |
| deburring                 | 0,25/0,27 |
| edge honing               | 0,30      |
| structuring               | 0,35      |
| descaling/paint stripping | 0,40      |
| weld seams                | 0,50      |

# Brushtechnology Industrial Brushes

Compatible deburring brush with high wire density for use in stationary machines such as benchtop grinders and tabletop deburrers.

**USAGE**

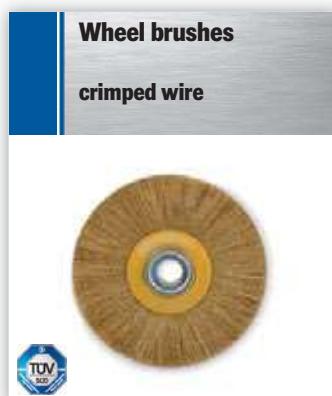

|                           |           |
|---------------------------|-----------|
| roughening                | 0,15      |
| planing                   | 0,20      |
| deburring                 | 0,25/0,27 |
| edge honing               | 0,30      |
| structuring               | 0,35      |
| descaling/paint stripping | 0,40      |
| weld seams                | 0,50      |

## Wheel brushes for deburring machines abrasive filament

Very wide and compact brush for tabletop deburrers for finishing cut edges.

### USAGE

|                           |        |
|---------------------------|--------|
| roughening                | (0,15) |
| planing                   | 0,40   |
| deburring                 | 0,60   |
| edge honing               | 0,80   |
| structuring               | 1,00   |
| descaling/paint stripping | 1,20   |
| weld seams                | 1,50   |

## **Internal finishing**

## **Important user information**

### **Brushes for internal finishing**

**To be noted when selecting brushes for internal finishing:**

## 1. General user information

Brushes for internal finishing are suitable for use with hand-held and stationary tools with drill or jaw chucks and tool spindles. Some products are designed exclusively for manual operation.

## **2. Typical brushes for internal finishing**

Some typical brushes used for internal finishing are shown below. The product overview on the following pages provides details of the whole range.

Helituf

Novoflex B

Novoflex S1

### **Micro-abrasive tube brush**

### Finding the right tool

Please check your product choice using the information in the info heading.

This will tell you the application for each product and its suitability, as well as providing a summary of the available trim materials suitable for the material being finished.

1 USE

- Internal cleaning, general
  - Deburring
  - Brushing edges/tapered grooves
  - Rust removal
  - Cleaning threads/holes
  - Plateau finish

- NHA 600/NHS 100+
- Nylon-diamond 400+800
- Orig. Osb. wire 0.08-0.20
- Filament brush 80-320
- Novofil WF 120-320
- Crimped steel wire 0.15-0.50
- Nutonal Alumina 100%

TRIM AND MATERIALS

- Product available with:
    - Steel wire, knotted
    - Steel wire, crimped
    - Steel wire, stainless
  - Brass wire
  - Abrasive bristle
  - Nylon-diamond
  - Natural bristle

# PROFESSIONAL INTERNAL FINISHING

| Product and material  | Properties  | Use   |
|---|---|---|
| <b>SITUFT</b><br> <p>Internal brushes with crimped original Osborn wire, fastened in a wing-shaped form.</p> | <p>Quick and easy to clamp in a wide variety of machines using different adapters. Designed for hand-held (e.g. pneumatic and electric tools), as well as stationary machines. The brushes can be clamped in collet chucks, jaw chucks and tool spindles.</p> | <p>For cleaning holes and internal surfaces that are difficult to reach, as well as longitudinal grooves.</p> |

Clockwise or anti-clockwise operation possible using an adapter. Can only be used in a clockwise direction without an adapter. The larger the diameter, the greater the flexibility of the brush.

|   |   |  |
|---|---|--|
| <b>HELITUF</b><br> <p>Internal brushes with original crimped Osborn wire, fastened in a spiral construction.</p> | <p>Designed for hand-held machines. The brushes can be mounted in drill sockets and on spindles. Chuck mounting is also possible using a Helituf adapter. The spiral-shaped construction simulates a stroke action.</p> | <p>To clean and deburr holes, to brush and deburr edges and tapered grooves.</p> |
|---|---|--|

An adapter can be used to increase the total length (incl. brush) to 225 mm.

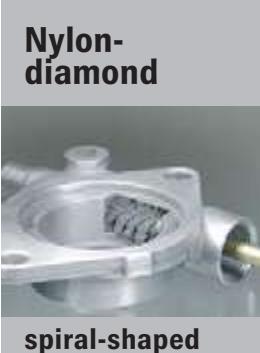

|   |   |   |
|---|---|---|
| <b>Micro-abrasive</b><br> <p>Tube brushes with flexible silicon carbide or aluminium oxide trim. Special shaft available upon request.</p> | <p>For use in CNC and NC machines, as well as processing centres.</p> | <p>To clean condensers and boiler pipes, deburr, clean and roughen coated surfaces.</p> |
|---|---|---|

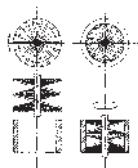

Brushes should be 5 – 10% larger than the diameter of the hole.

# Brushtechnology Industrial

## Internal finishing

| Product and material  | Properties  | Use  |
|---|---|--|
| <b>Nylon-diamond</b><br><br><b>spiral-shaped</b>   | <p>Tube brush, spiral-shaped<br/>Galvanised twisted wire, stabilised with shaft of pressed brass sleeve.</p> <p>Flexible trim; after heavy usage and deformation the filaments will recover. Filaments flex rather than break.<br/>High flexibility and high performance.<br/>Easy clamping in collet and jaw chucks.</p> | <p>Edge rounding, deburring of cross holes, further finishing of honed surfaces.<br/>Surface roughness reduced significantly.<br/>Ideal for finishing hard components (e.g. ceramic), hardened parts, precision components and parts for spiral-shaped aerospace applications.</p>                                     |
| <p><b>i</b> Brushes should be 10 – 15% larger than the diameter of the hole.</p>  |   |  |
| <b>Nylon-diamond</b><br><br><b>wing-shaped</b>  | <p>Tube brushes, wing-shaped<br/>Galvanised twisted wire, stabilised with shaft of pressed brass sleeve.</p> <p>Because of their very thin and flexible trim, the life of these brushes is longer than that of conventional brushes with a harder trim.</p>   | <p>Deburring and finishing, e.g. of longitudinal grooves.</p>  |
| <p><b>i</b> Brushes should be 10 – 15% larger than the diameter of the hole.</p>  |   |  |
| <b>Novoflex-B</b><br><br><span style="border: 1px solid black; border-radius: 50%; padding: 2px;">rpm</span> 350 – 700   | <p>Sturdy, self-centring honing tool. Flexible design with abrasive spheres.</p> <p>Suitable for hand-held and honing machines.<br/>For use in CNC and NC machines, processing centres and automatic equipment, clamping in tool spindles also possible.</p>  | <p>Edge breaks, final finishing of top surfaces. For use in non-round bores and for deburring and finishing of bearing holes during engine production.<br/>To create an even, fine-ground surface with a high contact ratio (plateau finish). The resulting cross-hatching is an ideal base for oil film adhesion.</p> |
| <p><b>i</b> Lubricants must always be used. We recommend lubricating the Novoflex-B with honing oil before use. Mineral oil, engine oil, water-soluble oil or cooling lubricants can be used as alternatives.<br/>Honing time: 20 – 40 sec. The process time can be reduced for deburring longitudinal and cross holes.<br/>Clean the bore using hot water and detergent and Osborn nylon tube brushes.</p> |   |  |

| Product and material  | Properties  | Use   |
|---|---|---|
| <b>Novoflex-H</b><br> <p>approx. 600–1.400 rpm</p> | <p>Flat brush with wing-shaped trim material, double wire core. Shaped on the outer contact surfaces to provide a larger working surface.</p>  <p>Flexible trim; after heavy usage and deformation the filaments will recover. Filaments flex rather than break.<br/>These honing brushes are used in a clockwise, oscillating movement.<br/>Easy clamping in collet and jaw chucks.</p> | <p>Surface finishing of workpieces that do not require deburring, e.g. internal finishing of pipes, manufacture of piston pumps, engines.</p> |

Brushes should be up to 25 % larger than the diameter of the hole.

|   |
|---|
| <b>Hole cleaning brushes,<br/>nozzle cleaning brushes,<br/>fitting brushes,<br/>terminal post brushes</b> |

### Tube & Internal Brushes

#### abrasive filament

Deburring cross-holes, control parts, O-Ring grooves and cylindrical bores. Recommendation: Brushes should be 10–15% larger than the bore.

#### USAGE

|                             | Internal cleaning                   | Deburring                | Brush edges/tapered grooves | Derust                   | Thread/drill hole cleaning | Plateau finish                      |

### **Internal finishing**

**Brushtechology Industrial**  
**ATB® – Advanced Technology Brush System**

BRUSHTECHNOLOGY  
INDUSTRIAL

# **PRODUCT INTRODUCTION**

## **ATB®**

### **Extremely long life**

- Lower piece cost for the deburring process
- High safety
- Reduced set-up costs and down times

### **Flexible long life**

- Dimensionally stable, also with longer trim lengths and high rotational speeds

### **High-tech filaments**

- High density of abrasive grit for powerful deburring
- Can be used with coolants

### **Extremely high fill density with even surface**

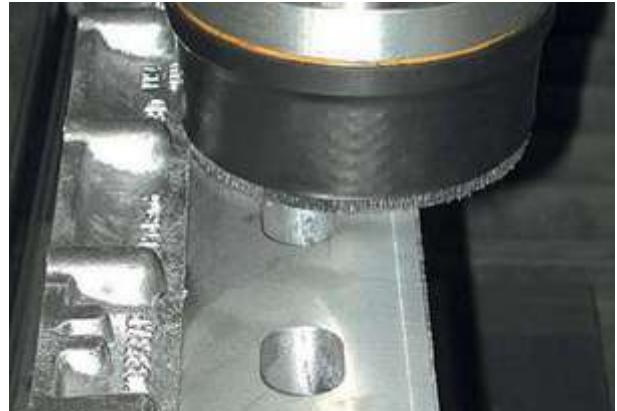

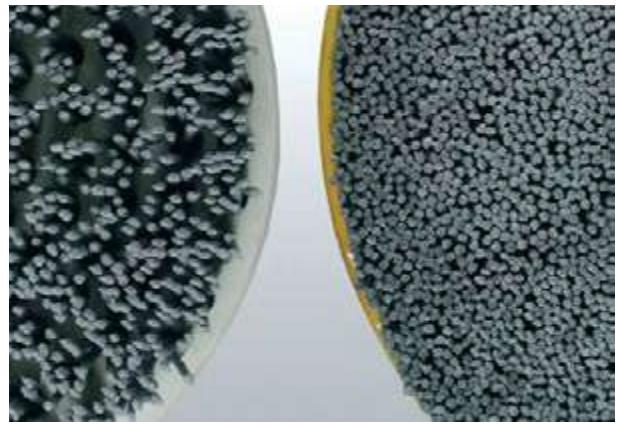

Shorter operating times and very even edge blending.  
Particularly suitable for deburring of:

- machined surfaces
- sintered products
- stampings and mouldings
- diecasted parts
- cylinder heads
- motor units
- hydraulic parts
- pneumatic parts

of different geometries and materials

### **Extremely high fill density**

The new ATB disc brushes have fill density which is 4 times higher than other disc brushes manufactured according to the conventional method (punched)! By this the brush life is increased many times over, with quicker processing times and better and more efficient results at the same time.

# Brushtechology Industrial

## ATB® – Advanced Technology Brush System

**ATB brush with maximum fill density compatible with clamping fixture**

For deburring applications of components with various materials just as e.g. steel, aluminum and cast iron.

**ATB brush with max. fill density for tool holders**

For deburring applications of sealing and contact surfaces as well as functional areas for a wide range of components.  
Use on stationary machines with cooling lubricant, water or oil is recommended.

# Brushtechology Industrial

## ATB® – Advanced Technology Brush System

For deburring applications of sealing and contact surfaces as well as functional areas for a wide range of components. Use on stationary machines with cooling lubricant, water or oil is recommended. For direct mounting on shell mill holders without need of additional clamping sets / systems.

Price on request.

Brushes for continuous deburring lines with planetary heads. Application: flat parts produced and deburred in punching, lasered, fine blanking or forming technology.

The Turbo-style sections of filaments can be angled to the right or to the left in a defined angle. Depending on the direction of rotation, the deburring will be more aggressive and effective or the brush is reaching a surface finish only.

## Novotec wheel brushes with fill material novofil®-DR

### Features of these brushes include

a single disc and steel flange. Extremely narrow face widths allow for cutting speeds of approximately 15 m/s (oscillating).

### Fill material

Novotec wheel brushes are provided with the hardest abrasive grit available: diamond chips. This ensures not only high performance but also prolonged brush life. On request, we can also supply novofil®-BR (abrasive grit: boron nitride).

### Filament

Round filaments

### Application range

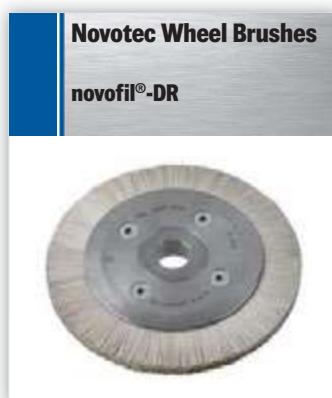

#### Ceramics

This brush type is designed for structuring cutting edge geometries of ceramic turnplates as well as deburring wheels.

#### Hard metal tools

- hard metal drills
- milling cutters
- hard metal turnplates
- circular saws

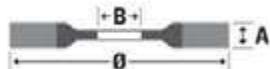

Cutting edge geometries are shaped by means of a defined cutting edge roundness. This prevents the cutting edge from breaking away during operation at higher cutting speeds and feeds.

**HEAVY-DUTY  
IDLER-ROLLERS**

# **Heavy-Duty Idler-Rollers**

## **Load Runners®**

# **MORE THAN JUST FINISHING WE KEEP THINGS MOVING**

Osborn Load Runners® are the ultimate heavy-duty load rail and idler roller solution in the industry, providing precision performance across numerous applications. Load Runners® help reduce your design time and lower overall material handling system costs.

### **Load Runners® Load Guidance Systems for Precision Handling of Heavy Loads in Tough Environments**

When reliability is paramount, combine the high capacity of Load Runners® idler-rollers with long-lasting, rugged Load Rails®, to move your products, people, or process from Point A to Point B.

Load Runners® feature heat-treated specialty steel, precision bearings, a maintenance-free lubrication and seal system, and a global network of sales support and application engineering expertise.

Often the "unsung hero" in the application, idler rollers play a significant role in the overall success of any rail-riding operation. Properly specified, idler rollers optimize line speed and product handling, regardless of material run or machinery used.

## Specials

### Strip brushes

# VERSATILE ALLROUNDER

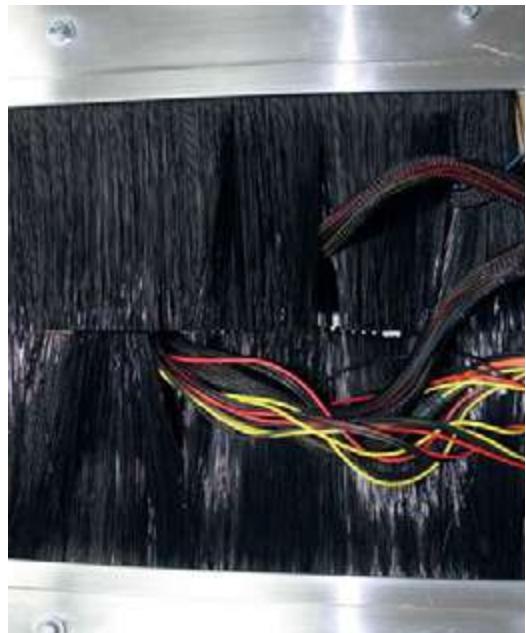

#### Strip brushes and aluminum extrusions

Find optimal solutions for your individual application with Osborn strip brushes.

##### Typical areas of application are e.g.:

- Sealing
- Guiding
- Positioning
- Transporting
- Protecting and shielding
- Skirting and closing of gaps e.g. cable bushing
- Wiping and striping

You can choose between numerous possibilities from our standard range. Our range includes brushes with nylon (PA6) and galvanized backings either as single unit or with aluminum extrusion in H- (180°) or F- (90°) profile. The aluminium extrusions are excellent in regard to optics and stability.

**Osborn nylon strip brushes are supplied in standard length of 3000 mm.**  
Customized solutions or different length can be supplied on request under consideration of our minimum order quantities.

#### Horse hair filling

In addition our standard range offers strip brushes with high-grade pure horse hair filling. They are an effective sealing for any kind of doors, gates and windows of buildings as they ensure protection against coldness, draught, insects, dust and noise.

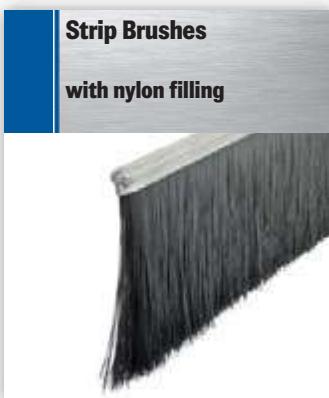

A positive side effect is that you will save energy with our durable, UV-resistant and flexible horse hair that ensures an optimal isolation and sealing effect.

**Our range offers standard length of 1000 and 2000 mm including our 180° aluminum extrusion ex stock.**

# BROOM FOR FARMING AND INDUSTRIAL

In production facilities, agricultural premises or recycling and waste-management sites there are a lot of areas which need to be kept clean at any time. Osborn has developed a sweeping solution that achieves this result easily, professionally and with low cost. Our broom consists of high quality single strip brushes which are assembled under a solid 5 mm galvanized hood.

The Osborn Broomate® can be attached to a big number of industrial or agricultural vehicles and cleans all sorts of heavy debris, but also liquids.

There are no rotating or electrical parts. Just mount the broom to your vehicle in no time and start sweeping.

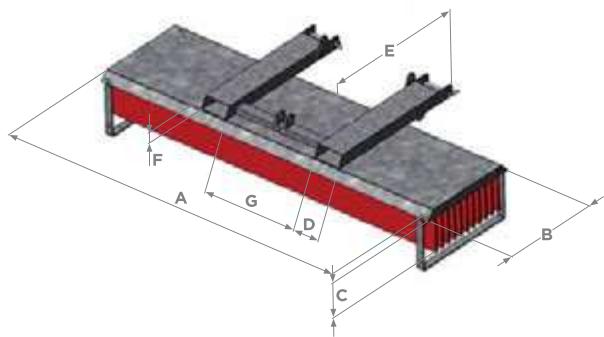

The galvanised steel cover that makes it easy to remove the brushes is available in different widths.

● Included ○ Optional

# **BROOMATE® ADVANTAGES**

## **Maintenance free**

- Simple and cost effective cleaning solution.
- No hydraulics, no motors, no rotating or electrical parts.
- Easy to clean simply with water or high-pressure washer.

## **Robust**

- 5 mm galvanized steel hood and fork-shoes and protective end-shield.

## **Versatile**

- Excellent cleaning capabilities suitable for heavy debris and dirt like gravel, sand, slurry and light snow, as well as for liquids.
- Bi-directional – sweep forward or in reverse.

## **Variable Mounting**

- Quick and easy mounting on almost any vehicle using optional adapters (extensive range available).

## **Long service life**

- Strip brushes last up to 1000 kilometers.

## **Environmentally friendly**

- All parts can be recycled.
- No need for motor oil, fuel or electric consumption.

## **Easy replacement**

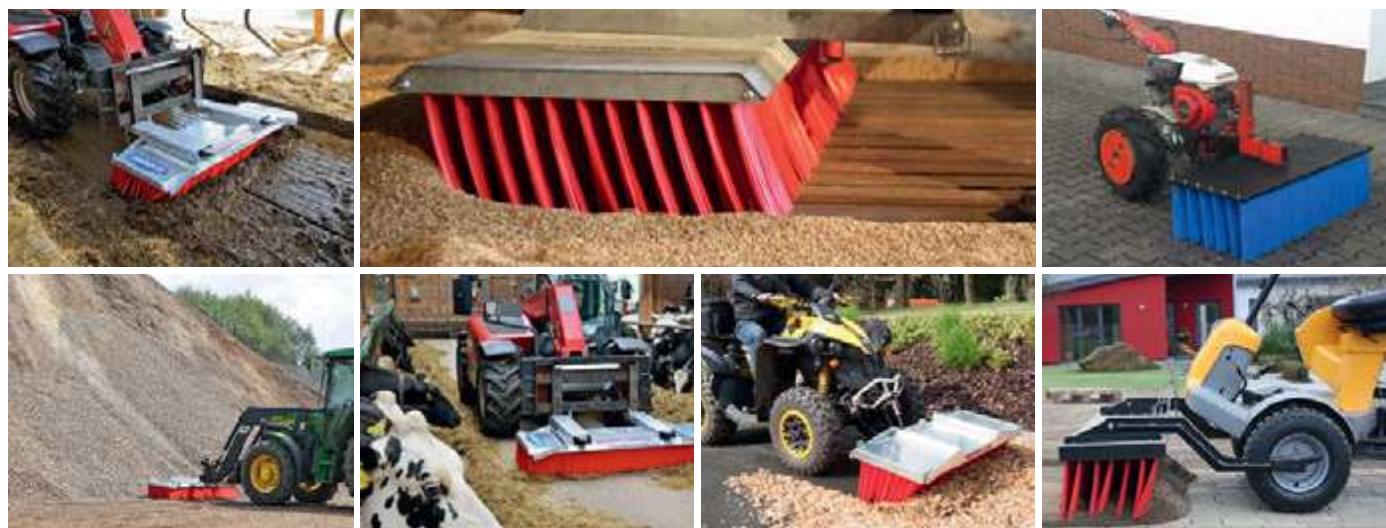

- Strip brushes can be replaced in an instant.
- Simply slide-out and slide-in.

## **Easy storage**

- Supporting frame prevents stripbrushes from bending in storage.

## **Safety First**

- No rotating parts, chains or motors.
- No noise, no dust.
